A World Transformed:

A World Transformed James Walvin, 2022-05-17 First published in Great Britain in 2022 by Robinson Title page verso

The Twentieth Century Neil DeMarco, Richard Radway, 1997 Written specifically for the GCSE modern world history syllabuses this text provides an accessible and carefully structured narrative The main topics of study include the Great War Nazi Germany Russia and the USSR the United States Britain international relations the Second World War and the Cold War The exercises included reflect the authors teaching experiences and are designed to promote pupil skills aiding them in the effective use of sources and narrative as well as providing the basis for more extended written answers **Same Bed,**

Different Dreams David M. Lampton, 2001-01-11 The title of this unique insider's look at a crucial decade of Sino American interchange derives from a Chinese expression that describes a relationship of two people whose lives are intimately intertwined but who do not fundamentally communicate with each other David M Lampton former president of the National Committee on U S China Relations demonstrates that while the United States and China have enormous interests at stake in their bilateral relationship neither has been particularly deft in dealing with the other His fascinating account shows how the processes of globalization along with the development of international regimes and multilateral organizations have brought America and China increasingly close in the global bed At the same time their respective national institutions interests popular perceptions and the very characters of their two peoples assure that the nations continue to have substantially different dreams Lampton explores the reasons why the Sino American relationship is so difficult for both nations to manage and suggests ways it can be more effectively conducted in the future His unique experience in China nearly thirty years as a scholar as the head of a policy oriented exchange organization and as director of Washington think tank research programs enabled him to spend extended periods with Chinese leaders and see them as they encountered America as well as to observe U S leaders as they tried to come to grips with Chinese circumstances Among many other key events Lampton witnessed firsthand the aftermath of Tiananmen Square successive congressional battles over most favored nation tariff treatment the end of the Bush era and the rocky beginning of the Clinton administration the death of Deng Xiaoping and Jiang Zemin's transition to power the reversion of Hong Kong to Chinese sovereignty and the Asian financial crisis that unfolded from mid 1997 to the end of the decade Lampton's careful documentary research is supplemented by interviews and accounts of his personal interaction throughout the period with leaders and key players in Washington Beijing Taipei and Hong Kong The book thus represents a singular combination of historical research policy analysis and personal observation and offers guidance for those in both America and China who must shape this critical relationship in the twenty first century

Acting Alone Bradley F. Podliska, 2010-03-16 *Acting Alone A Scientific Study of American Hegemony and Unilateral Use of Force Decision Making* is a straight forward analysis of unilateral U S military actions which are dependent upon the power disparity between the U S and the rest of the world In solving the puzzle as to why individual presidents have made

the wrong decision to act alone the author lays out a president's behavior during a crisis as a two step decision process Acting Alone reviews the well studied first decision deciding to use force based on international conflict literature and organized along traditional lines The author then details the second decision deciding to use unilateral force with an explanation of the criticisms of multilateralism and the reasons for unilateralism To test a new theory of unilateral use of force decision making Acting Alone devises a definition and coding rules for unilateral use of force develops a sequential model of presidential use of force decision making and constructs a new alternative measure of military power a Composite Indicator of Military Revolutions CIMR It then uses three methods a statistical test with a heckman probit model an experiment and case studies to test U S crisis behavior since 1937 By applying these three methods the author finds that presidents are realists and make expected utility calculations to act unilaterally or multilaterally after their decision to use force The unilateral decision in particular positively correlates with a wide military gap with an opponent an opponent located in the Western hemisphere and a national security threat

Dreams for a Decade Stephanie L. Freeman, 2023-04-18 During the 1980s millions of ordinary individuals around the world mobilized in support of nuclear disarmament Although U S President Ronald Reagan and Soviet General Secretary Mikhail Gorbachev were not part of these grassroots movements they too wanted to eliminate nuclear weapons Nuclear abolitionism was a diverse and global phenomenon In Dreams for a Decade Stephanie L. Freeman draws on newly declassified material from multiple continents to examine nuclear abolitionists influence on the trajectory of the Cold War's last decade Freeman reveals that nuclear abolitionism played a significant yet unappreciated role in ending the Cold War Grassroots and government nuclear abolitionists shifted U S and Soviet nuclear arms control paradigms from arms limitation to arms reduction This paved the way for the reversal of the U S Soviet nuclear arms race which began with the landmark 1987 Intermediate Range Nuclear Forces Treaty European peace activists also influenced Gorbachev's common European home initiative and support for freedom of choice in Europe which prevented the Soviet leader from intervening to stop the 1989 East European revolutions These revolutions ripped the fabric of the Iron Curtain which had divided Europe for more than four decades Despite their inability to eliminate nuclear weapons grassroots and government nuclear abolitionists deserve credit for playing a pivotal role in the Cold War's endgame They also provide a model for enacting dramatic positive change in a peaceful manner

Hanoi's War Lien-Hang T. Nguyen, 2012-07-15 While most historians of the Vietnam War focus on the origins of U S involvement and the Americanization of the conflict Lien Hang T. Nguyen examines the international context in which North Vietnamese leaders pursued the war and American intervention ended This riveting narrative takes the reader from the marshy swamps of the Mekong Delta to the bomb saturated Red River Delta from the corridors of power in Hanoi and Saigon to the Nixon White House and from the peace negotiations in Paris to high level meetings in Beijing and Moscow all to reveal that peace never had a chance in Vietnam Hanoi's War renders transparent the internal workings of America's most elusive

enemy during the Cold War and shows that the war fought during the peace negotiations was bloodier and much more wide ranging than it had been previously Using never before seen archival materials from the Vietnam Ministry of Foreign Affairs as well as materials from other archives around the world Nguyen explores the politics of war making and peace making not only from the North Vietnamese perspective but also from that of South Vietnam the Soviet Union China and the United States presenting a uniquely international portrait *Private Women, Public Lives* Bárbara Reyes,2009-05-01 Through the lives and works of three women in colonial California Bárbara O Reyes examines frontier mission social spaces and their relationship to the creation of gendered colonial relations in the Californias She explores the function of missions and missionaries in establishing hierarchies of power and in defining gendered spaces and roles and looks at the ways that women challenged and attempted to modify the construction of those hierarchies roles and spaces Reyes studies the criminal inquiry and depositions of Barbara Gandiaga an Indian woman charged with conspiracy to murder two priests at her mission the divorce petition of Eulalia Callis the first lady of colonial California who petitioned for divorce from her adulterous governor husband and the testimonio of Eulalia Pérez the head housekeeper at Mission San Gabriel who acquired a position of significant authority and responsibility but whose work has not been properly recognized These three women's voices seem to reach across time and place calling for additional more complex analysis and questions Could women have agency in the colonial Californias Did the social structures or colonial processes in place in the frontier setting of New Spain confine or limit them in particular gendered ways And were gender dynamics in colonial California explicitly rigid as a result of the imperatives of the goals of colonization *The Great Experiment* Strobe Talbott,2009-03-17 Acclaimed journalist Talbott tells the story of humankind's struggle to band together for protection and profit and the urgent need for a new birth of American leadership to meet the looming threats of terror climate change and nuclear catastrophe When the World Seemed New Jeffrey A. Engel,2017 The untold story of how George H W Bush faced a critical turning point of history the end of the Cold War based on unprecedented access to heretofore classified documents and dozens of interviews with key policymakers **Great Power, Great Responsibility** Michael Poznansky,2025-08-13 In *Great Power Great Responsibility* Michael Poznansky explores how the liberal international order established after World War II has influenced US foreign policy from 1945 to the present Proponents argue that its impact has been profound producing a system that has been more rule bound and beneficial than any previous order Critics charge that it has failed to prevent the US itself from consistently violating rules and norms Poznansky contends that the answer lies in between with America's approach to compliance a function of two primary factors the intensity of competition over international order and the burden of complying with the liberal order's core tenets Drawing on nine case studies the book sheds important light on the future of US foreign policy in an era where American unipolarity has ended and great power rivalry has returned
