These observations, however, leave important questions unanswered. For example, the evidence on the effects of the 1999-2000 recession on the employment of women is mixed. On the one hand, the unemployment rate for women has increased since 1999, but the rate for men has increased even more. On the other hand, the unemployment rate for women has decreased since 1999, but the rate for men has decreased even more.
