Assessment in Education Shelleyann Scott,Donald E. Scott,Charles F. Webber,2015-10-20 This book provides key insights into how educational leaders can successfully navigate the turbulence of political debate surrounding leading student assessment and professionalised practice Given the highly politicised nature of assessment it addresses leaders and aspiring

leaders who are open to being challenged willing to explore controversy and capable of engaging in informed critical discourse The book presents the macro concepts that these audiences must have to guide optimal assessment policy and practice Collectively the chapters highlight important assessment purposes and models including intended and unintended effects of assessment in a globalised context The book provides opportunities to explore cultural similarities and particularities It invites readers to challenge taken for granted assumptions about ourselves and colleagues in other settings The chapters highlight the cultural clashes that may occur when cross cultural borrowing of assessment strategies policies and tools takes place However authors also encourage sophisticated critical analyses of potential lessons that may be drawn from other contexts and systems Readers will encounter challenges from authors to deconstruct their assessment values beliefs and preconceptions Indeed one purpose of the book is to destabilise certainties about assessment that prevail and to embrace the assessment possibilities that can emerge from cognitive dissonance Field & Stream ,1973-04 FIELD STREAM America s largest outdoor sports magazine celebrates the outdoor experience with great stories compelling photography and sound advice while honoring the traditions hunters and fishermen have passed down for generations

Educational Authorities and the Schools Helene Ärlestig,Olof Johansson,2020-05-28 This book describes and analyses the organisation functions and development of national educational authorities and agencies and the influence they have on local schools in 20 countries around the world It examines the governing chain in the respective countries from both a theoretical and descriptive perspective It does so against the background of the stability and rigour of the governing chains having been challenged with some researchers considering the chain to be broken However the view that comes to the fore in this book is that the chain is still present and contains both vertical implementation structures and intervening spaces for policy interpretation How schools become successful is important for the individual students as well as the local community and the national state A vast quantity of research has looked at what happens in schools and classrooms At the same time national governance and politics as well as local prerequisites are known to exert influence on schools and their results to a high degree Societal priorities problems and traditions provide variety in how governance is executed This book provides an

international overview of the similarities and differences between educational agencies and how their work influences schools
