International Conference on Security, Surveillance and Artificial Intelligence (ICSSAI-2023) Debasis Chaudhuri,Jan Harm Pretorius,Debashis Das,Sauvik Bal,2024-05-23 The International Conference on Security Surveillance Artificial Intelligence ICSSAI2023 was held in West Bengal India during December 1 2 2023 The conference was organized by the Techno India University one of the renowned universities in the state of West Bengal which is committed for generating disseminating and preserving knowledge *CD1- and MR1-restricted T Cells in Antimicrobial Immunity* S.M. Mansour Haeryfar,Thierry Mallewaey,2016-01-21 Cell mediated immunity to extracellular and intracellular microbes has been traditionally linked to CD4 and CD8 T cells that recognize pathogen derived peptides in the context of major histocompatibility complex MHC class II and class I molecules respectively Recent progress in our understanding of early host defense mechanisms has brought unconventional innate like T cells into the spotlight These are a heterogeneous population of non MHC restricted T cells that exhibit memory like properties and mount emergency responses to infection They may directly detect and destroy infected cells but are best known for their ability to regulate downstream effector cells including but not limited to conventional T cells Innate like T cells include among others CD1 restricted natural killer T NKT cells and MR1 restricted mucosa associated invariant T MAIT cells NKT cells recognize lipid antigens and MAIT cells were recently demonstrated to respond to microbe derived vitamin B metabolites However much remains to be learned about the antigen specificity range of these cells their activation mode and their true potentials in immunotherapeutic applications Like in many other areas of biology uncertainties and controversies surrounding these cells and some of the experimental models techniques and reagents employed to study them have brought about excitement and sometimes hot debates This Special Topic was launched to provide updated reviews on protective and or pathogenic roles of NKT and MAIT cells during infection Leading experts discuss current controversies pressing questions and the challenges that lie ahead for the advancement of this intriguing and rapidly evolving area of immunology Unlike MHC CD1 and MR1 display very limited polymorphism Therefore NKT and MAIT cells may be considered attractive targets for various diseases in diverse human populations The

potential benefits of NKT cell and MAIT cell based vaccination and treatment strategies in infectious diseases is an important subject that is also covered in this Topic

The Taxing Road to Sustainable Growth: Resource Productivity and Corporate Taxation Mark Bowler Smith, 2013 This book explores one way in which a tax system might help promote competitiveness and sustainable development Focusing on the UK corporation tax it recommends the introduction of a Resource Productivity Tax Credit where resource productivity is defined as the money value of outputs relative to the money value of material resource and non renewable energy inputs The book is structured such that it first explores the legal mandate to promote competitiveness and sustainable development as contained in article 3 3 of the Treaty of the European Union It then explores what competitiveness and sustainable development actually mean particularly in an EU policy context through the lenses of Europe 2020 and the EU Sustainable Development Strategy It concludes that not only is there a great deal of common ground between competitiveness and sustainable development as objectives but that increasing resource productivity is a necessary means to those shared ends After exploring EU tax policy and the relevant rules of the UK corporation tax for evidence of any kind of focus on competitiveness and sustainable development as well as examining the suitability of corporate income taxes as policy instruments for increasing resource productivity the book concludes that there is ample scope for a statutory tax incentive to be appended to the UK corporation tax to help fulfil the article 3 mandate The headline

objective of the Resource Productivity Tax Credit is to promote higher resource productivity in the trading activities of individual companies in particular targeted sectors through improvements to the knowledge base of those companies rather than through the increased use of raw materials non renewable energy and or intermediate goods
