AI Developments for Industrial Robotics and Intelligent Drones Gupta, Brij B.,Colace, Francesco,2024-12-13 In today s rapidly evolving technological landscape industries increasingly turn to industrial robots and intelligent drones to streamline processes improve efficiency and reduce costs However the complexity of these smart devices coupled with the need for seamless integration of machine learning AI robotics and deep learning technologies poses significant challenges for researchers and practitioners alike As a result there is a growing demand for comprehensive resources that explore the latest advancements in these fields and provide practical insights and solutions for effectively leveraging these technologies AI Developments for Industrial Robotics and Intelligent Drones addresses this pressing need by offering a detailed and insightful examination of the key technologies driving the development of industrial robots and intelligent drones Through its in depth exploration of topics such as industrial robots intelligent drones IoT integration programming control systems and security this book

provides readers with a holistic view of the challenges and opportunities in the field This book is a comprehensive guide for researchers scholars and professionals seeking to understand and harness the full potential of these technologies

Distributed Economic Operation in Smart Grid: Model-Based and Model-Free Perspectives Jiahu Qin,Yanni Wan,Fangyuan Li,Yu Kang,Weiming Fu,2023-01-25 This book aims to work out the distributed economic operation in smart grids in a systematic way which ranges from model based to model free perspectives The main contributions of this book can be summarized into three folds First we investigate the fundamental economic operation problems in smart grids from model based perspective Specifically these problems can be modeled as deterministic optimization models and we propose some distributed optimization algorithms by integrating the multi agent consensus theory and optimization techniques to achieve the distributed coordination of various generation units and loads Second due to the randomness of the large scale renewable energies and the flexibility of the loads we further address these economic operation problems from a model free perspective and we propose learning based approaches to address the uncertainty and randomness At last we extend the idea of model based and model free algorithms to plug in electric vehicles PEVs charging discharging scheduling problem the key challenge of which involves multiple objectives simultaneously while the behavior of PEVs and the electricity price are intrinsically random This book presents several recent theoretical findings on distributed economic operation in smart grids from model based and model free perspectives By systematically integrating novel ideas fresh insights and rigorous results this book provides a base for further theoretical research on distributed economic operation in smart grids It can be a reference for graduates and researchers to study the operation and management in smart grids Some prerequisites for reading this book include optimization theory matrix theory game theory reinforcement learning etc
