At each stop on the tour the authors investigate unusual and quirky aspects of statistics highlighting historical biographical and philosophical dimensions of this field of knowledge. Each chapter opens with perspectives on its theme often from several points of view. Five original and thought provoking questions follow. These aim at widening readers knowledge and deepening their insight. Scattered among the questions are entertaining puzzles to solve and tantalising paradoxes to explain. Readers can compare their own statistical discoveries with the authors detailed answers to all the questions. The writing is lively and inviting, the ideas are rewarding and the material is extensively cross referenced. *A Panorama of Statistics* Leads readers to discover the fascinations of statistics.
