Lambdin, Nancy L. Smith, Anna Rogers, Leicha Bragg, Audrey Cooke, Melissa Fanshawe, Mark Gronow, 2025-10-10

Understanding and Teaching Primary Mathematics Tony Cotton, 2016-05-26 Written by an education consultant with widespread experience of teaching mathematics in the UK and internationally Understanding and Teaching Primary Mathematics seamlessly combines pedagogy and subject knowledge to build confidence and equip you with all the skills and know how you need to successfully teach mathematics to children of any age This 3rd edition has been fully updated to reflect the latest research developments and initiatives in the field as well as key changes to both the UK National Curriculum and International Baccalaureate including a brand new chapter on Algebra and a reworked focus on the early years Extra features also include helpful call outs to the book s revised and updated companion website which offers a shared site with a range of resources relevant to both this book and its new companion volume Teaching for Mathematical Understanding Stimulating accessible and well illustrated with comprehensive coverage of subject knowledge and pedagogy Understanding and Teaching Primary Mathematics is an essential purchase for trainee and practising teachers alike Companion website features new to this edition include video clips in which the author demonstrates the concepts covered in the book through teaching to a real class PowerPoint presentations which provide support for those using the book as a part of a teacher training course updated weblinks to external sites with useful teaching information and resources **From Text to 'Lived' Resources** Ghislaine Gueudet, Birgit Pepin, Luc Trouche, 2011-09-06 What kinds of curriculum materials do mathematics teachers select and use and how This question is complex in a period of deep evolutions of teaching resources with the proficiency of online resources in particular How do teachers learn from these materials and in which ways do they tailor them for their use and pupil learning Teachers collect resources select transform share implement and revise them

Drawing from the French term *ing nerie documentaire* we call these processes documentation The literal English translation is to work with documents but the meaning it carries is richer Documentation refers to the complex and interactive ways that teachers work with resources in class and out of class individually but also collectively **ENC Focus**,2001 Learning, Creating, and Using Knowledge Joseph Donald Novak,2010 This fully revised and updated edition of Learning Creating and Using Knowledge recognizes that the future of economic well being in today s knowledge and information society rests upon the effectiveness of schools and corporations to empower their people to be more effective learners and knowledge creators Novak s pioneering theory of education presented in the first edition remains viable and useful This new edition updates his theory for meaningful learning and autonomous knowledge building along with tools to make it operational that is concept maps created with the use of CMapTools and the V diagram The theory is easy to put into practice since it includes resources to facilitate the process especially concept maps now optimised by CMapTools software CMapTools software is highly intuitive and easy to use People who have until now been reluctant to use the new technologies in their professional lives are will find this book particularly helpful Learning Creating and Using Knowledge is essential reading for educators at all levels and corporate managers who seek to enhance worker productivity *Focal Points* Renee Tipton Clift,Carolyn M. Evertson,1992 The focus of this monograph is on the distinctions between questions addressed in research on teaching and issues of concern in teacher education and on the interplay of curricular contextual and pedagogical issues in both public schools and university settings The publication is organized into seven chapters 1 Action Research and the Work of Teachers Susan E Noffke 2 Developing Reflective Practice in Initial Teacher Education Courses The Place of Reading and Writing Peter Lucas and Jean Rudduck 3 Personal Perspectives and Learning To Teach Writing Mary Louise Gomez and Trish L Stoddard 4 Mathematics in Elementary School Tasks Ralph T Putnam 5 Learning in Classroom Settings Making or Breaking a Culture Elaine C Collins and Judith L Green 6 Teacher Culture from the Inside A Case Study of Change from the Perspective of Active Participant Observer Joyce Henstrand May and 7 Moving Pictures Multiple Frames Renee T Clift and Carolyn M Evertson References are appended to chapters LL Teaching in the Standards-based Classroom ,2001 Virtually every national standards document every state framework and every local set of standards calls for fundamental changes in what and how teachers teach The challenge for teachers is to implement the vision for mathematics and science classrooms called for in the standards This issue describes that vision and suggests ways to use the standards mandated in your school to improve your practice to help you teach in your standards based classroom *The Core* Leigh A. Bortins,2025-10-16 In the past correct spelling the multiplication tables the names of the state capitals and the American presidents were basics that all children were taught in school Today many children graduate without this essential knowledge Most curricula today follow a haphazard sampling of topics with a focus on political correctness instead of teaching students how to study Leigh Bortins a leading figure in the homeschooling community is having none of it She believes that there are core areas of knowledge that

are essential to master Without knowing the multiplication tables children can't advance to algebra Without mastery of grammar students will have difficulty expressing themselves Without these essential building blocks of knowledge students may remember information but they will never possess a broad and deep understanding of how the world works In The Core Bortins gives parents the tools and methodology to implement a rigorous thorough and broad curriculum based on the classical model including Rote memorization to cement knowledge Systematic learning of geography historical facts and timelines Reading the great books and seminal historical documents instead of adaptations and abridged editions Rigorous training in math and the natural sciences

Understanding Mathematics for Young Children Derek Haylock, Anne D Cockburn, 2013-05-17 A new edition of this bestselling book which helps trainee and practising teachers understand mathematical concepts and how children learn them as well as ably teach young children maths

Mathematics Across the Curriculum Sue Fox, Liz Surtees, 2010-07-08 Looks at the theory and practice of providing inspiring challenging and engaging cross curricular mathematics lessons

Resources in Education, 1992-12

Forms of Mathematical Knowledge Dina Tirosh, 2013-03-14 What mathematics is entailed in knowing to act in a moment Is tacit rhetorical knowledge significant in mathematics education What is the role of intuitive models in understanding learning and teaching mathematics Are there differences between elementary and advanced mathematical thinking Why can't students prove What are the characteristics of teachers' ways of knowing This book focuses on various types of knowledge that are significant for learning and teaching mathematics The first part defines, discusses and contrasts psychological, philosophical and didactical issues related to various types of knowledge involved in the learning of mathematics The second part describes ideas about forms of mathematical knowledge that are important for teachers to know and ways of implementing such ideas in preservice and in-service education The chapters provide a wide overview of current thinking about mathematics learning and teaching which is of interest for researchers in mathematics education and mathematics educators Topics covered include the role of intuition in mathematics learning and teaching the growth from elementary to advanced mathematical thinking the significance of genres and rhetoric for the learning of mathematics and the characterization of teachers' ways of knowing

Daily Warm-Ups: Problem Solving Math Grade 1 Mary Rosenberg, 2011-06-21 Solving word problems requires both strategy and skill When confronted with a problem students need to figure out how to solve the problem and then solve it The 250 exercises in each book help students learn a variety of strategies for solving problems as well as grade-specific math skills

Fundamental Maths Mark Breach, 2017-09-16 Do you need to improve your confidence in maths Does your maths need to be refreshed and refocused for engineering or science Are there some elements of school maths you have forgotten or never quite mastered With clear explanations, lots of examples and a friendly encouraging style Fundamental Maths is a short, easy-to-follow textbook that makes maths accessible and manageable for all Written for students entering HE or FE courses in engineering or science the author covers all the core topics and breaks them down into easily digestible chunks

keeping explanations clear and concise throughout Put past anxieties about maths or gaps in your knowledge behind you
