Starting with White's medievalist research and youthful fascination for French existentialism Paul shows how White became increasingly convinced that historical writing is a moral activity. He goes on to argue that the critical concepts that have secured White's fame—trope, plot, discourse, figural realism—all stem from his desire to explicate the moral claims and perceptions underlying historical writing. White emerges as a passionate thinker, a restless rebel against scientism, and a defender of existentialist humanist values. This innovative introduction will appeal to students and scholars across the humanities and help develop a critical understanding of an increasingly important thinker.
