Introduction to Mathematical Statistics Fetsje Bijma, Marianne Jonker, Aad Vaart, 2025-10-01 Statistics is the science that focuses on drawing conclusions from data by modeling and analyzing the data using probabilistic models In An Introduction

to Mathematical Statistics the authors describe key concepts from statistics and give a mathematical basis for important statistical methods Much attention is paid to the sound application of those methods to data The three main topics in statistics are estimators tests and confidence regions The authors illustrate these in many examples with a separate chapter on regression models including linear regression and analysis of variance They also discuss the optimality of estimators and tests as well as the selection of the best fitting model Each chapter ends with a case study in which the described statistical methods are applied This book assumes a basic knowledge of probability theory calculus and linear algebra Proceedings of the Berkeley Symposium on Mathematical Statistics and Probability Jerzy Neyman,1949 *Statistics* Gerald C.
