The book s core argument is that an artificial intelligence that could equal or exceed human intelligence sometimes called artificial general intelligence AGI is for mathematical reasons impossible It offers two specific reasons for this claim Human intelligence is a capability of a complex dynamic system the human brain and central nervous system Systems of this sort cannot be modelled mathematically in a way that allows them to operate inside a computer In supporting their claim the authors Jobst Landgrebe and Barry Smith marshal evidence from mathematics physics computer science philosophy linguistics and biology setting up their book around three central questions What are the essential marks of human intelligence What is it that researchers try to do when they attempt to achieve artificial intelligence AI And why after more than 50 years are our most common interactions with AI for example with our bank s computers still so unsatisfactory Landgrebe and Smith show how a widespread fear about AI s potential to bring about radical changes in the nature of human beings and in the human social order is founded on an error There is still as they demonstrate in a final chapter a great deal that AI can achieve which will benefit humanity But these benefits will be achieved without the aid of systems that are more powerful than humans which are as impossible as AI systems that are intrinsically evil or able to will a takeover of human society Resources in Education ,1997 *Sourcebook of Family Theories and Methods* Pauline Boss,William J.

Doherty,Ralph LaRossa,Walter R. Schumm,Suzanne K. Steinmetz,2008-11-19 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots i e sources from which these orientations and strategies flow Thus an appropriate way to preface this book is to talk first of its roots its beginnings In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself A goal was thus set to write a book that like Janus would face both backward and forward a book that would

give readers both a perspective on the past and a map for the future There were precedents for such a project The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964 the two Contemporary Theories about the Family volumes edited by Wesley Burr Reuben Hill F Ivan Nye and Ira Reiss published in 1979 and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz then in production
