Decker, 2016-03-01 Can blockbuster films be socially relevant or are they just escapist diversions to entertain the masses and enrich the studios Not every successful film contains thoughtful commentary but some that are marketed as pure entertainment do seriously engage social issues

Popular science fiction films of the late 1970s and early 1980s such as George Lucas' Star Wars trilogy, Ridley Scott's *Alien* and *Aliens*, and James Cameron's *Terminator* films present a critique of our engagement with technology in a way that resonates with 1960s counterculture. As challengers of the status quo's technological underpinnings, Luke Skywalker, Ellen Ripley, and Sarah Connor echo the once popular social criticism of philosopher Herbert Marcuse and speak directly to the concerns of people living in a technologically complex society. The films of Lucas, Scott, and Cameron made money but also made us think about the world we live in.

The Gift of Destruction Geoffrey Riddell, 2013. This is the story of a small mind riding alien alone out on strange skies. He reaches a faraway skyland safely and then far from home and family he struggles to rescue himself, his new friends, and ultimately even his enemies for he is the last of the Tigtetti famous in ancient history for being a happy forgiving enemy. There are Lands in the sky, there are planets on the move, there are huge battleships, and there are aliens big and horrible enough to scare the pants off any normal kid, but Rakkit is tougher, rougher, sillier, and more revolting than anyone else and in his own way is just as scary.

The Social Biology of Wasps Kenneth G. Ross, Robert W. Matthews, 2018-08-06. In this edited collection, 17 internationally known authorities bring together the results of recent research on the natural history, ecology, behavior, morphology, and genetics of wasps as they pertain to the evolution of social behavior. The first part of the book opens with a review of the classification of the family Vespidae along with a revision of the subfamily Polistinae. Seven subsequent chapters deal with the natural history and social biology of each of the major taxa of social and presocial vespids. The second part of the book offers chapters on reproductive competition, worker polyethism, evolution of nest architecture, of queen number and queen control, and of exocrine glands, population genetics, the nutritional basis of social evolution, and the nest as the locus of social life. The final chapter is a comparative discussion of social behavior in the Sphecidae, the only family of wasps besides the Vespidae in which well developed social behavior is known. Providing a wealth of information about the biology of wasps, this comprehensive up to date volume will be an essential reference for entomologists, evolutionary biologists, behavioral ecologists, ethologists, and zoologists. Contributors: James M. Carpenter, David P. Cowan, Holly A. Downing, Raghavendra Gadagkar, Albert Greene, James H. Hunt, Robert L. Jeanne, Makoto Matsuura, Robert W. Matthews, Hudson K. Reeve, Peter Frank Roseler, Kenneth G. Ross, J. Philip Spradbery, Christopher K. Starr, Stefano Turillazzi, John W. Wenzel, Mary Jane West-Eberhard.

Darwinian Natural Right Larry Arnhart, 1998-04-02. This book shows how Darwinian biology supports an Aristotelian view of ethics as rooted in human nature. Defending a conception of Darwinian natural right based on the claim that the good is the desirable, the author argues that there are at least twenty natural desires that are universal to all human societies because they are based in human biology. The satisfaction of these natural desires constitutes a universal standard for judging social practice as either fulfilling or frustrating human nature, although prudence is required in judging what is best for particular circumstances. The author studies the familial bonding of parents and children and the conjugal bonding of men and women as illustrating social behavior that conforms to Darwinian natural

right He also studies slavery and psychopathy as illustrating social behavior that contradicts Darwinian natural right He argues as well that the natural moral sense does not require religious belief although such belief can sometimes reinforce the dictates of nature
