The Archaeology of Animals Simon J. M. Davis, 2012-11-12 Ever since the discovery of fossil remains of extinct animals associated with flint implements bones and other animal remains have been providing invaluable information to the archaeologist In the last 20 years many archaeologists and zoologists have taken to studying such archaeofaunal remains and the science of zoo archaeology has come into being What was the nature of the environment in which our ancestors lived In which season were sites occupied When did our earliest ancestors start to hunt big game and how efficient were they as hunters Were early humans responsible for the extinction of so many species of large mammals 10 20 000 years ago When where and why were certain animals first domesticated When did milking and horse riding begin Did the Romans influence our eating habits What were sanitary conditions like in medieval England And could the terrible pestilence which afflicted the English in the seventh century AD have been plague These are some of the questions dealt with in this book The book also describes the nature and development of bones and teeth and some of the methods used in zoo archaeology

Practical Ecology for Geography and Biology M. Gilbertson, 2012-12-06 Our aim in writing this book is to provide students and teachers with a simple introductory text which deals with practical aspects of ecology environmental biology and biogeography emphasizing actual field and classroom investigations Basic concepts and methods of survey mapping and aerial photography data collection and data analysis are described and discussed in order to encourage students to identify and tackle worthwhile projects The level at which this text is appropriate depends very much upon particular circumstances The greater part lies within the scope of the sixth form and the first and second years of college polytechnic and university courses in the British Isles and their equivalents overseas All students inevitably meet difficulties in the identification of plant and animal species particularly when they venture into unfamiliar habitats and regions This is often the cause of unnecessary alarm Many ecological principles or problems may be illustrated by reference to familiar species and habitats such as are found in urban environments as well as those areas of semi natural vegetation favoured for field courses

A Boone and Crockett Club Field Guide to Measuring and Judging Big Game Philip L. Wright, William H. Nesbitt, 2003 A publication that is intended to answer questions about how to score big game trophies Contains numerous illustrations as well as pointers on field judging trophy quality in the field

Wildlife Research in Australia Jordan O. Hampton, Bradley P. Smith, Helen P. Waudby, Corinne

Alberthsen, 2022-07-01 *Wildlife Research in Australia Practical and Applied Methods* is a guide to conducting wildlife research in Australia. It provides advice on working through applications to animal ethics committees, presents general operating procedures for a range of wildlife research methods, and details animal welfare considerations for all Australian taxa. Compiled by over 200 researchers with extensive experience in field-based wildlife research, teaching, and animal ethics administration, this comprehensive book supports best practice research methods and helps readers navigate the institutional animal care approval process. *Wildlife Research in Australia* will help foster a national approach to wildlife research methods and is an invaluable tool for researchers, teachers, students, animal ethics committee members, and organisations participating in wildlife research and other activities with wildlife.

Marine Mammals of the World Thomas A. Jefferson, Stephen Leatherwood, Marc A. Webber, Food and Agriculture Organization of the United Nations, 1993-01-01 Identification guide to marine mammals and to cetaceans, seals, and sirenians found in fresh water.

The Natural History of Canadian Mammals Donna Naughton, 2014-11-11 This section features descriptions of pikas, hares, and rabbits, shrews, moles, and bats. *The Natural History of Canadian Mammals* is a beautifully illustrated, up-to-date guide to all 215 known species of mammals in Canada. It features brand-new full-colour images of each species, as well as stunning photographs from Canadian Geographic magazine's national photography competitions depicting the animals in their natural environments. Along with being a visual treat, this book is jam-packed with information accessible to readers at all levels. Detailed descriptions are provided of each mammal's appearance, habitat, and behavior, while colour maps show their full distribution across Canada, North America, and globally. The book also includes practical guides on tracking and identification for readers who would like to learn how to spot mammals in the wild. Among its most special features is a series of colour plates with vignettes of the Canadian representatives of each group, sized relative to one another for easy comparison and linked to the full species accounts later in the book.
