

PART B — (5 × 16 = 80 marks)

11. (a) Discuss the characteristics requirements and the required mechanisms to realize the requirements of WSN. (16)  
Or  
(b) Discuss the potential applications of wireless sensor networks. (16)
12. (a) (i) Draw and explain the overview of sensor node hardware components. (8)  
(ii) Discuss in detail about the concept of event-based programming. (8)  
Or  
(b) (i) Explain the need for gateways and also explain how internet and WSN communication can be established with a diagram. (10)  
(ii) Describe the energy efficiency of WSN. (6)
13. (a) Give short notes on :  
(i) Assignment of MAC addresses  
(ii) Mediation device protocol. (8 + 8 = 16)  
Or  
(b) Explain in detail any two geographic routing protocols. (16)
14. (a) What is Sensor Tasking and Control? Briefly explain about task driven sensing and information based Sensor Tasking. (16)  
Or  
(b) Discuss in detail any two localization and positioning algorithms. (16)
15. (a) (i) List the factors that make the use of innovative development models particularly important. (8)  
(ii) Explain the system architecture of a canonical wireless sensor node. (8)  
Or  
(b) (i) Write the inferences that can be drawn from power analysis of sensor nodes. (8)  
(ii) Write the properties and the main design challenges of data dissemination protocols in a wireless sensor network. (8)

## **Anna University Wireless Network University Question Paper:**

**Ad Hoc and Wireless Sensor Networks** Nami Susan Kurian, About Book The inspiration behind this book is when I felt that there is need of simplified book on Ad Hoc and Sensor Networks that can help the students to understand the concepts in an easy manner This book is written as per the latest Anna University syllabi Regulation 2017 This book contains five units which covers the whole syllabus Unit 1 Deals with the fundamentals of Ad hoc network and Sensor Network It also describes the different routing protocols for Ad Hoc Wireless Networks Unit 2 Provides an in depth knowledge on sensor network architecture and design issues Unit 3 Understands the MAC layer and transport layer issues It also describes the protocols used in MAC later and transport layer Unit 4 Illustrates the security issues possible in Ad hoc and Sensor networks Unit 5 Provides an exposure to mote programming platforms and tools At the end of every unit possible short answer and long answer questions are also given This book will be beneficial for the Engineering students as it helps in easy understanding of the concepts in best and easier way

**Technology Road Mapping for Quantum Computing and Engineering** Mishra, Brojo Kishore, 2022-03-25 Quantum computing is radically different from the conventional approach of transforming bit strings from one set of zeros and ones to another With quantum computing everything changes The physics used to understand bits of information and the devices that manipulate them are vastly different Quantum engineering is a revolutionary approach to quantum technology Technology Road Mapping for Quantum Computing and Engineering explores all the aspects of quantum computing concepts engineering technologies operations and applications from the basics to future advancements Covering topics such as machine learning quantum software technology and technology road mapping this book is an excellent resource for data scientists engineers students and professors of higher education computer scientists researchers and academicians

**Neural Networks for Natural Language Processing** S., Sumathi, M., Janani, 2019-11-29 Information in today s advancing world is rapidly expanding and becoming widely available This eruption of data has made handling it a daunting and time consuming task Natural language processing NLP is a method that applies linguistics and algorithms to large amounts of this data to make it more valuable NLP improves the interaction between humans and computers yet there remains a lack of research that focuses on the practical implementations of this trending approach Neural Networks for Natural Language Processing is a collection of innovative research on the methods and applications of linguistic information processing and its computational properties This publication will support readers with performing sentence classification and language generation using neural networks apply deep learning models to solve machine translation and conversation problems and apply deep structured semantic models on information retrieval and natural language applications While highlighting topics including deep learning query entity recognition and information retrieval this book is ideally designed for research and development professionals IT specialists industrialists technology developers data analysts data scientists academics researchers and students seeking current research on the fundamental

concepts and techniques of natural language processing      Smart Spaces and Next Generation Wired/Wireless Networking Sergey Balandin,Roman Dunaytsev,Yevgeni Koucheryavy,2010-08-26 This book constitutes the refereed proceedings of the 10th International Conference on Next Generation Teletraffic and Wired Wireless Advanced Networking NEW2AN 2010 held in conjunction with the Third Conference on Smart Spaces ruSMART 2009 in St Petersburg Russia in August 2010 The 27 revised NEW2AN full papers are organized in topical sections on performance evaluation performance modeling delay disruption tolerant networking and overlay systems integrated wireless networks resource management and multimedia communications The 14 revised ruSMART full papers are about smart spaces use cases smart M3 platform and smart spaces solutions      **Harnessing AI and Digital Twin Technologies in Businesses** Ponnusamy, Sivaram,Assaf, Mansour,Antari, Jilali,Singh, Satyanand,Kalyanaraman, Swaminathan,2024-07-26 The intersection of artificial intelligence AI and digital twin technology presents a problem and an unparalleled opportunity for transformation Businesses grapple with the need for operational excellence innovation and a competitive edge all while navigating the intricate web of data analytics decision making and real time monitoring In response to these challenges Harnessing AI and Digital Twin Technologies in Businesses emerges as an example of insight and guidance offering a comprehensive exploration of the complementary connection between AI and digital twin technology In a world where the convergence of these powerful tools transforms business intelligence enabling initiative taking decision making and dynamic simulations This book serves as a solution for decision makers technologists and researchers seeking to not only understand but harness the potential of AI powered digital twins to enhance productivity creativity and judgment in their operations      **Internet of Things** Manish Soni,2024-11-13 Welcome to Internet of Things The Internet of Things IoT is more than just a buzzword it s a transformative force that s reshaping the way we interact with the world around us From smart homes that anticipate our needs to industrial processes optimized for efficiency the IoT has woven itself into the fabric of our daily lives and industries promising a future of unprecedented connectivity and convenience This book Internet of Things is your comprehensive guide to understanding developing for and thriving in this exciting and dynamic field Whether you re a curious newcomer a seasoned developer or a business leader seeking to harness the potential of IoT this book has something to offer you The journey through the pages of this book will take you from the fundamentals of IoT exploring its history and core concepts to diving deep into the technologies and protocols that power it You ll discover the myriad of applications where IoT is making a difference from smart homes and healthcare to agriculture and smart cities We ll explore the critical issues surrounding IoT such as data security and privacy and equip you with the knowledge to navigate these challenges effectively Through hands on examples and practical advice you ll gain the skills needed to develop IoT solutions whether you re building a simple home automation project or a complex industrial system But this book isn t just about the nuts and bolts of IoT it s also about the bigger picture We ll examine the ethical and social implications of a world where everything is connected discussing the responsible development and

deployment of IoT technologies As you delve into the Chapters that follow you ll find a wealth of information insights and inspiration to fuel your IoT journey This book is a testament to the incredible possibilities that emerge when our physical world meets the digital realm and we hope it serves as a valuable resource on your quest to master the Internet of Things The IoT landscape is evolving rapidly and it s an exciting time to be a part of this technological revolution So let s embark on this journey together and explore the limitless potential of the Internet of Things

***Distributed Computing in Sensor Systems*** Rajmohan Rajaraman,Thomas Moscibroda,Adam Dunkels,Anna Scaglione,2010-06-16 The book constitutes the refereed proceedings of the 6th International Conference on Distributed Computing in Sensor Systems DCOSS 2010 held in Santa Barbara CA USA in June 2010 The 28 revised full papers presented were carefully reviewed and selected from 76 submissions The research contributions in this proceedings span important aspects of sensor systems including energy management communication coverage and tracking time synchronization and scheduling key establishment and authentication compression medium access control code update and mobility

***Ad Hoc Networks*** Shiwen Mao,Scott Midkiff,Hua Zhu,2010-02-17 Ad hoc networks refer to the wireless networking paradigm that covers a variety of network forms for specific purposes such as mobile ad hoc networks sensor n works vehicular networks underwater networks underground networks personal area networks and home networks The various forms of ad hoc networks promise a broad scope of applications in civilian commercial and military areas which have led to significant new research problems and challenges and have attracted great efforts from academia industry and government This unique networking paradigm necessitates re examination of many established wireless networking concepts and protocols and calls for developing new fundamental understanding of problems such as interference mobility connectivity capacity and security among others While it is essential to advance theoretical research on fundamentals and practical research on efficient algorithms and protocols it is also critical to develop useful applications experimental prototypes and real world deployments to achieve a practical impact on our society for the success of this networking paradigm The annual International Conference on Ad Hoc Networks AdHocNets is a new event that aims at providing a forum to bring together researchers from academia as well as practitioners from industry and government to meet and exchange ideas and recent research work on all aspects of ad hoc networks As the first edition of this event AdHocNets 2009 was successfully held in Niagara Falls Ontario Canada during September 22 25 2009
