educational literature How these ideas apply in your day to day practice of teaching and learning A set of questions for you to consider as you seek to develop your pedagogy in a particular topic area Further reading and references including links to relevant writings in other publications or online sources Teaching is a broad and complex activity so whether you are thinking about becoming a teacher training to be a teacher or a qualified teacher wishing to keep abreast of the latest thinking in the field the ideas contained in this book will prove helpful and constructive as you seek to develop your teaching skills Every so often a new idea unfolds that seems so deceptively simple that one wonders why it hasn't appeared before now this is the case with A Z of Teaching Serving as a high definition map of classroom teaching it provides mentorship for survival and thriving in the profession Comprehensive without being laboured rich in concepts without succumbing to clutter ingeniously economic in the identification of key themes without being trifling Savage and Fautley manage to distil the important and inspiring from vast amounts of theory research and practical experience of teaching and present the essential elements in a most accessible manner for early career teachers More experienced educators will also find many gems to renew and inspire their practice The approach is pragmatic whilst never seeking to trivialise the challenges of teaching or the vast amounts of extant theories Most importantly the reflective questions at the end of each section serve to provoke further thinking research and action thus contributing meaningfully to the development of effective and reflective teachers for contemporary schools Regina Murphy PhD Senior Lecturer St Patrick's College Dublin City University Ireland The construction of this book is very satisfying it is so straightforward to access and simultaneously works at so many levels Using the tried and tested structure of an A to Z listing Jonathan Savage and Martin Fautley consider a number of highly significant aspects of education pedagogy and professional issues for teachers at all stages of their professional development In their consideration of some 103 topics they skilfully blend key theoretical underpinning with current practice in the classroom making this book extremely useable by teachers in all sectors and age phases The range of topics makes this especially useful because it covers some big issues but also explores some less frequently covered things such as audience and elicitation What I have found particularly helpful is the fact that in this book I readily recognise aspects of my own classroom practice in the overview of each topic but I am encouraged and inspired to reflect more deeply on my professional development in the light of the collected wisdom and challenging questions This book will be an invaluable tool for training and beginning teachers as well as for those with years of experience The inclusion of key questions and further reading means that it can serve as a very accessible reference book an aide memoir or as a stimulus for more detailed debate discussion or professional development Consequently it will support the work of individuals department or phase teams or even larger groups The potential to individualise training and coaching by referring trainees to relevant entries is great I will certainly want to use it when working with trainee teachers and also with teachers undertaking CPD and Masters qualifications I look forward to Volume 2 appearing in the future Simon Spencer Birmingham City University UK I am

Creative Metaphor, Evaluation, and Emotion in Conversations about Work Jeannette Littlemore,Sarah Turner,Penelope Tuck,2023-09-06 This book explores the roles played by creative and conventional metaphor in expressing positive and negative evaluation within a particular workplace drawing on interviews with 31 current and former employees of the British Civil Service Metaphor is often used to express evaluation but relatively few studies have investigated the ways in which metaphor is used to evaluate personal emotionally

charged experiences The volume explores how metaphor serves a predominantly evaluative function with creatively used metaphors often more likely than conventional metaphors to perform an evaluative function particularly when the evaluation is negative or ambiguous The findings provide a deeper understanding of the relationship between evaluation creativity and metaphor Examples including military metaphors and family metaphors show how creativity often comes through subverting the norms of use of a particular metaphor category or altering the valence from its conventional use The study elucidates the myriad ways in which people push at the boundaries of linguistic creativity in their efforts to describe the qualitative nature of their experiences Demonstrating how metaphor can be a powerful tool for the nuanced expression of complex and ambiguous evaluation this book will appeal to researchers interested in better understanding metaphor creativity evaluation and workplace cultures
