NERVOUS SYSTEM

The nervous system controls the body's functions

Parts of the nervous system

- 1. Brain - the control center of the body
- 2. Spinal cord - the main pathway for information
- 3. Nerves - the communication lines between the brain and the rest of the body
- 4. Sensory receptors - detect changes in the environment
- 5. Effectors - respond to the information received

ENDOCRINE SYSTEM

- 1. Hormones - chemical messengers that regulate the body's functions
- 2. Endocrine glands - produce and release hormones
- 3. Target organs - the organs that respond to hormones

Endocrine system

- 1. Hypothalamus - the control center of the endocrine system
- 2. Pituitary - the master gland of the endocrine system
- 3. Thyroid - produces thyroid hormone

Library Notes North Carolina College for Women. Library, 1930 The Hippocampus Robert Isaacson, 2012-12-06 These books are the result of a conviction held by the editors authors and publisher that the time is appropriate for assembling in one place information about functions of the hippocampus derived from many varied lines of research Because of the explosion of research into the anatomy physiology chemistry and behavioral aspects of the hippocampus some means of synthesis of the results from these lines of research was called for We first thought of a conference In fact officials in the National Institute of Mental Health suggested we organize such a conference on the hippocampus but after a few tentative steps in this direction interest at the federal level waned probably due to the decreases in federal support for research in the basic health sciences so keenly felt in recent years However the editors also had come to the view that conferences are mainly valuable to the participants The broad range of students of all ages of brain behavior relations do not profit from conference proceedings unless the proceedings are subsequently published Furthermore conferences dealing with the functional character of organ systems approached from many points of view are most successful after participants have become acquainted with each other's work Therefore we believe that a book is the best format for disseminating information and that its publication can be the stimulus for many future conferences Library Notes University of North Carolina (1793-1962).
