AGRICULTURAL AND IRRIGATION ENGINEERING BRANCH
SECOND SEMESTER
PH 7253- PHYSICS FOR AGRICULTURAL AND IRRIGATION ENGINEERING
(Regulation 2015)

Time: 3hr

Max Mark: 100

Answer All Questions
Part – A (10x2=20 Mark)

1. What are the different types of source used for food irradiation?
2. What are the general application and dose categories referred for food irradiation?
3. What are the different types of Bio physical Methods used in Agriculture?
4. Name the effects that are achieved in environmental protection by the use of Bio Physical Method?
5. Define spectral signature and what is the role of it in remote sensing?
6. Write short notes on GIS?
7. Name the different types of water movement in soil with reasons?
8. Compare soil compaction and soil consolidation?
9. Name the parts present in external structure of leaf?
10. What is difference between photosystem I and Photosystem II?

Part – B (5x16=80Mark)

11. Give an account on various types of Interaction of Ionizing and Non-Ionizing radiation?
12. a) What are the effects of new methods implicated in agriculture in protection of Environment?
OR
b) Discuss in detail about the application and effects of Biophysical methods in agriculture?
13. a) Describe in detail Soil temperature and heat flow?
OR
b) Elaborate soil as a three phase system?
14. a) Give an account on the sensors used in remote sensing?
OR
b) Expound in detail about DIP?
15. a) Give an account on light reaction in Photosynthesis?
OR
b) Discuss in detail about Calvin cycle with a neat diagram?

Anna University Question Papers For Civil Engineering:

Applied Geology (For Anna) D.V. Reddy, 2010 Applied Geology is a multidisciplinary subject that interacts with other disciplines such as mineralogy petrology structural geology hydrogeology seismic engineering rock engineering soil mechanics geophysics remote sensing RS GIS GPS environmental geology etc This book entitled Applied Geology is the only one of its kind in the Indian market that caters to the needs of all these subjects This book covers all aspects of Applied Geology and is intended to serve BTech students A plethora of examples and case studies relevant to the Indian context have been included for better understanding of the geological challenges faced by engineers **BUILDING MATERIALS, SECOND EDITION** VARGHESE, P. C., 2015-02-26 This practice oriented book now in its second edition presents a lucid yet comprehensive coverage of the engineering properties and uses of the materials commonly used in building construction in India Profusely illustrated with tables and diagrams the book brings into light the basics of building materials and their specifications Besides giving information regarding the traditional building materials the text now acquaints the reader with up to date and in depth information pertaining to modern materials available in the market The references to IS codes and standards make this text suitable for further study and field use The second edition possesses some substantial changes in Chapters 12 13 14 and 20 Now the book offers a new section on durability of concrete in Chapter 12 a modified section regarding revision of IS 10262 1982 code on concrete mix design to IS 10262 2009 and a new section on classification of exposure conditions in Chapter 13 and a new section relating to large advances made in concrete construction and repair chemicals in Chapter 14 Besides the content of Chapter 20 has been completely updated with a particular emphasis on the extensive use of aluminium in building construction Primarily intended for the students pursuing undergraduate degree B E B Tech and diploma courses in civil engineering and architecture the book on account of lecture based presentation of the subject should also prove eminently utilitarian for the young teachers to use it in their classroom lectures as well as for practising engineers to get a clear understanding of the fundamentals of the subject **NEW TO THE SECOND EDITION** Review questions at the end of each chapter enable the reader to recapitulate the topics Considerable attention is given on field practice Syllabus of laboratory work on construction materials and a model question paper Anna University are given in appendices to guide the reader **Solid Mechanics (For Anna University)** Bhavikatti S.S., Throughout the book emphasis has been laid on developing the concepts clarifying the units to be used in final equations and neatly presenting solutions for the numerical problems The features of this one stop book will help the students to prepare themselves for taking up the design papers taught in higher classes **Key Features** 1 Use of SI units 2 Summary of important concepts and formulae at the end of the book 3 Large number of solved problems presented systematically 4 Large number of exercise problems 5 Simple and clear explanation of concepts 6 Generous use of diagrams for better understanding 7 Includes University question papers **Management Concepts for Civil Engineers** K. Anbuvelan, 2005 **BUILDING MATERIALS** P. C.

VARGHESE,2005-01-01 This practice oriented book provides a lucid yet comprehensive coverage of the engineering properties and uses of the materials commonly used in building construction in India Profusely illustrated with tables and diagrams the book exposes the reader to the basics of building materials and their specifications The text also acquaints the reader with the traditional as well as modern materials available in the market The references to IS codes and standards make this text suitable for further study and field use This book is primarily designed as an introductory textbook for the students pursuing undergraduate degree B E B Tech and diploma courses in civil engineering and architecture Because of the lecture based presentation of the subject the text would also be of considerable benefit for the young teachers for their classroom lectures Practising engineers would also get a clear understanding of the fundamentals of the subject

Principles of Management MG-1351 K. Anbuvelan,2007 *Principles of Management* K. Anbuvelan,2007 *Global Perspectives on Air Pollution Prevention and Control System Design* Venkatesan, G.,Thirumal, Jaganthan,2019-06-25 Once pollutants are released into the atmosphere they cannot be removed easily nor can the reaction with atmospheric constituents be ceased However through enhancing our understanding of control technology further addition of pollution can be forestalled Through better understanding of innovations in the field of air pollutant control technology and modelling better cost effective control equipment can be designed to achieve a clean biosphere for sustainable life in the near future *Global Perspectives on Air Pollution Prevention and Control System Design* is a pivotal reference source that provides vital research on the understanding of the basic concepts of air pollution modeling concepts development of various models for source specific pollutants and dispersion While highlighting topics such as climate change fossil fuels and motor vehicle emissions this publication explores the links between the global impact on climate change and modeling concepts of indoor air pollutants This book is ideally designed for professors students researchers environmental agencies environmentalists policymakers and government officials seeking current research on future solutions in critical fields of air pollution

Recent Advances in Materials, Mechanical and Civil Engineering P. Nageswara Rao,R. Kotaiah,D. Venkateswarlu,2018-02-15 ICRAMMCE 2017 Selected peer reviewed papers from the International Conference on Recent Advances in Material Mechanical and Civil Engineering 2017 ICRAMMCE 2017 June 1 2 2017 Hyderabad India XXX *Russian-Polish-Slovak Seminar Theoretical Foundation of Civil Engineering (RSP 2021)* Pavel Akimov,Nikolai Vatin,2021-09-14 This book gathers the latest advances innovations and applications in the field of civil environmental and construction engineering as presented by researchers and engineers at the XXX Annual Russian Polish Slovak Seminar Theoretical Foundation of Civil Engineering RSP held in September 2021 Co organized by six universities from Russia Poland and Slovakia the event covered diverse topics such as structural mechanics building structures geodesy and geotechnics transport and environmental issues in civil engineering The contributions which were selected by means of a rigorous international peer review process highlight numerous exciting ideas that will spur novel research directions and foster

multidisciplinary collaborations Who's who in Indian Engineering and Industry ,1962 *THEORY OF ELASTICITY AND PLASTICITY* HELENA, H. JANE,2017-07-01 Theory of Elasticity and Plasticity is designed as a textbook for both undergraduate and postgraduate students of engineering in civil mechanical and aeronautical disciplines This book has been written with the objective of bringing the concepts of elasticity and plasticity to the students in a simplified and comprehensive manner The basic concepts definitions theory as well as practical applications are discussed in a clear logical and concise manner for better understanding Starting with general relationships between stress strain and deformations the book deals with specific problems on plane stress plane strain and torsion in non circular sections Advanced topics such as membrane analogy beams on elastic foundations and plastic analysis of pressure vessels are also discussed elaborately For better comprehension the text is well supported with Large number of worked out examples in each chapter Well labelled illustrations Numerous Review Questions that reinforce the understanding of the subject As all the concepts are covered extensively with a blend of theory and practice this book will be a useful resource to the students **ARCHDESIGN '19 / VI. V. L. R. Anjaneyulu,M. Harikrishna,Shriniwas S. Arkatkar,A. Veeraragavan,2022-11-10 The book presents the select proceedings of the 8th International Conference on Transportation Systems Engineering and Management CTSEM 2021 The book covers topics pertaining to three broad areas of transportation engineering namely Transportation Planning Traffic Engineering and Pavement Technology The topics covered include transportation and land use urban and regional transportation planning travel behavior modeling travel demand analysis forecasting and management transportation and ICT public transport planning and management freight transport traffic flow modeling and management highway design and maintenance capacity and level of service traffic crashes and safety ITS and applications non motorized transportation transportation economics and policy road and parking pricing pedestrian facilities and safety road asset management pavement materials and characterization pavement design and construction pavement evaluation and management transportation infrastructure financing innovative trends in transportation systems sustainable transportation smart cities resilience of transportation systems and environmental and ecological aspects This book will be useful for the students researchers and the professionals in the area of civil engineering especially transportation and traffic engineering Proceedings of the Institution of Civil Engineers ,2005 **Environmental Challenges in Civil Engineering II** Zbigniew Zembaty,Zbigniew Perkowski,Damian Beben,Maria Rossella Massimino,Oren Lavan,2023-03-01 This book gathers a selection of papers presented at the 5th International Scientific Conference Environmental Challenges in Civil Engineering ECCE 2022 held on September 26 28 2022 in Opole Poland Written by an international group of experts it reports on findings concerning structural material

behavior and new methods and technologies in constructions A special emphasis is given to sustainable constructions practices including material recycling and reuse renovation and restoration of historical building and to those fostering sustainable development of cities and rural areas and a better integration of buildings with the environment Offering a good balance of theory and practice and covering both technical and organizational aspects in civil engineering and architectural projects this book offers extensive information on solutions and current challenges in construction projects and structural interventions in the context of environmental protection and earthquake prevention

High-performance Sustainable Materials and Structures Prince Lazar,I. A. Palani,Manish Kumar,2024-10-31 This book underscores the idea of harnessing the sustainable designs and materials in nature and integrating them into the field of engineering to design innovative materials and structures with multifunctional properties targeting defense automotive aerospace electronics nuclear healthcare energy sports packaging etc to offer improved safety reliability performance durability sustainability and functionality The concept of sustainability involves the understanding of how nature has evolved solutions to various challenges over millions of years and applying these principles to design innovative materials and structures with multifunctional properties This book provides a thorough examination of the methods and techniques used in developing sustainable materials and structures highlighting their potential for multifunctional applications The book delves into the expansion of our understanding in this field which is accompanied by novel synthesis and processing methods These methods and techniques incorporate sustainable strategies to create innovative materials and systems to offer a wide range of properties and functions making them highly attractive for various applications in different fields of advanced technology In addition these materials and structures can be tailored to have specific properties and functions such as self healing capabilities high strength to weight ratios and enhanced energy absorption which are the prime requirements for the researchers looking for lightweight materials and structures
