Global Business Yongsun Paik, Dong Chen, 2017-05-08 This textbook is designed to help students understand the key issues of global business by connecting theory with reality Divided into three parts it covers critical issues of international business introducing readers to topics they will connect with and discussing core concepts With a user friendly pedagogy and a host of helpful visuals the authors offer a practitioner s perspective on global business knowledge examining familiar theory on trade direct investment and political environment alongside fresh topics like geopolitical

conflicts emerging markets and sustainability Over sixty case studies are included to illustrate the magnitude and complexity of global business involving different stakeholders Undergraduate students looking for an introduction to international business and graduate students looking to apply their knowledge will find Global Business stimulating since it demonstrates how theories and concepts work in real world business settings

The Political Economy of Automotive Industrialization in East Asia Richard F. Doner, Gregory W. Noble, John Ravenhill, 2021 East Asia is a powerhouse of automobile production Yet across the region national automobile industries have had strikingly different patterns of development Despite starting from equally low levels of performance and initially similar strategies countries have experienced vastly different results From Thailand's success as an assembly hub for foreign automakers and China's unexpected achievements in building its own car industry to South Korea's impressive development of an integrated industry to the Philippines persistent weakness these divergent paths offer a fascinating window into the determinants of economic growth The Political Economy of Automotive Industrialization in East Asia provides a political explanation for why development strategies and performance have been so uneven within one of the world's most important regions Utilizing interviews and original language research from multiple nations this book explains that factors such as market size and neoclassical economic policies alone cannot explain these patterns of development Richard F Doner Gregory W Noble and John Ravenhill instead highlight the significance of two sets of factors countries very different capabilities for implementing policies and the political forces that help to explain the emergence of effective institutions Through cross national analyses of China Taiwan South Korea Indonesia Malaysia the Philippines and Thailand the book sets up a clear structure for understanding industrial development and how it enables or constrains the capabilities of domestic firms Brief comparisons with Brazil Mexico and other developing countries confirm the utility of the analytic framework and demonstrate how it is superior both to accounts in mainstream economics and much of political science which fail to give sufficient emphasis to the role of public and public private institutions or provide an explanation of the political bases of those institutions In a world where auto assemblers and suppliers are facing new challenges in an ever evolving industry such as the transition to electric and autonomous vehicles this book offers a crucial perspective on the centrality of institutional capacities and political economy By tracing the divergent trajectories of seven nations The Political Economy of Automotive Industrialization in East Asia offers lessons beyond the automobile industry that illustrate the broader importance of institutions to economic growth
