Revisiting the Biome Concept with a Functional Lens Daniel M. Griffith, Christopher J. Still, Colin P. Osborne, 2019-08-02 Early biogeographers such as Alexander von Humboldt recognized the broad scale coupling of vegetation and climate This observation shaped the modern biome concept which organizes ecosystems by assumed relationships to environmental controls This approach has been criticized for missing key impacts on the distribution and functioning of biomes like historical contingency biogeographic history disturbance ecology and evolution Are biomes still a convenient framework for organizing our understanding of biodiversity What factors determine the functional differences among and within biomes and at what spatial temporal and phylogenetic scales are those drivers most important How can we better represent the functional characteristics and dynamics of ecosystems This Research Topic highlights the latest discussions and research on biomes drawing from a wide range of approaches spanning from macroecology and phylogeography to remote sensing and modelling ecosystem responses to global change

The Dawn Angiosperms Xin Wang, 2017-08-02 This book discusses the controversial and conflicting hypotheses on the origin of angiosperms which was generally assumed to be restricted to the Cretaceous and later ages Since publishing the first edition of *The Dawn of Angiosperms* in 2010 several important advances have been made in this field of science namely 1 the discovery of new fossil angiosperms from the Jurassic 2 European researchers discovering angiosperm like pollen from the Triassic and most importantly 3 the discovery of a perfect flower from the Jurassic All of these findings are at odds with the currently widely accepted evolutionary theories and thus call upon us to critically reassess botanical theory Accordingly the new edition of this book not only includes more new fossil taxa but also documents them in greater detail and corrects many commonly held

misconceptions In so doing it makes related studies and teaching on the early history of angiosperms more realistic concrete and tangible providing concrete fossil evidence as the basis for future research and helping to distinguish the most accurate botanical hypotheses Science Insights ,1999 **NTA NEET 40 Days Crash Course in Biology with 41 Online Test Series 3rd Edition** Disha Experts,2018-12-17 This book contains an Access Code in the starting pages to access the 41 Online Tests NTA NEET 40 Days Crash Course in Biology is the thoroughly revised updated redesigned study material developed for quick revision and practice of the complete syllabus of the NEET exams in a short span of 40 days The book can prove to be the ideal material for class 12 students as they can utilise this book to revise their preparation immediately after the board exams The book contains 38 chapters of class 11 12 and each Chapter contains NEET 5 Years at a Glance i e Past 5 years QUESTIONS of 2018 2014 with TOPIC WISE Analysis Detailed Mind Maps covers entire JEE Syllabus for speedy revision IMPORTANT CRITICAL Points of the Chapter for last minute revision TIPS to PROBLEM SOLVING to help students to solve Problems in shortest possible time Exercise 1 CONCEPT BUILDER A Collection of Important Topic wise MCQs to Build Your Concepts Exercise 2 CONCEPT APPLICATOR A Collection of Quality MCQs that helps sharpens your concept application ability Answer Keys Detailed Solutions of all the Exercises and Past years problems are provided at the end of the chapter ONLINE CHAPTER TESTS 38 Tests of 15 Questions for each chapter to check your command over the chapter 3 ONLINE Full Syllabus MOCK TESTS To get familiar with exam pattern and complete analysis of your Performance
