Great camel caravans brought salt, iron, copper, cloth, books, and pearls from the north and northeast. They were exchanged for gold, kola nuts, ivory, leather, rubber, and slaves from the south. The Niger River became a major artery of trade. When the caravans met the Niger, their goods would be unloaded on riverboats, and the camels would return north carrying valuable commodities from the south like gold.

Salt

Timbuktu: A Center for Trade

Most of the people of ancient Mali made their living in agriculture, just as they do today. People needed coffee, goats, sheep, and some camels in the north. Crop agriculture was more common in the wetter south.

Resistance Stories from Black History for Kids
Rann Miller, 2023-03-07 Black history is a robust and multifaceted chapter in world history that is often watered down History books tend to highlight whitewashed versions of African enslavement the Civil Rights Movement and other safe topics that while important do not fully encapsulate the experiences of the Black and African diaspora By telling the stories that are often omitted from history Resistance Stories from Black History for Kids sets out to show that the Black experience is not only defined by marching and boycotting but also through rebellion and resistance Learn about little known facets events and figureheads from Black history including Vicente Guerrero the first Black North American president One Marie Judge and her escape to freedom from George Washington Dr Carter G Woodson and the real reason he created Black History Month The history of the dap and its roots in African tradition Mansa Musa and his travels throughout the continent of Africa And many more exciting stories Written by an expert educator highly experienced in historical analysis and diversity Resistance Stores from Black History for Kids is the ultimate lesson in Black history that will empower and inspire the youth through its retellings of the stories often left by the wayside

The Rebirth of Education Lant Pritchett, 2013-09-30
Despite great progress around the world in getting more kids into schools too many leave without even the most basic skills In India s rural Andhra Pradesh for instance only about one in twenty children in fifth grade can perform basic arithmetic The problem is that schooling is not the same as learning In The Rebirth of Education Lant Pritchett uses two metaphors from nature to explain why The first draws on Ori Brafman and Rod Beckstrom s book about the difference between centralized and decentralized organizations The Starfish and the Spider Schools systems tend be centralized and suffer from the limitations inherent in top down designs The second metaphor is the concept of isomorphic mimicry Pritchett argues that many developing countries superficially imitate systems that were successful in other nations much as a nonpoisonous snake mimics the look of a poisonous one Pritchett argues that the solution is to allow functional systems to evolve locally out of an environment pressured for success Such an ecosystem needs to be open to variety and experimentation locally operated and flexibly financed The only main cost is ceding control the reward would be the rebirth of education suited for today s world
