Mastering OpenCV with Practical Computer Vision Projects Daniel Lélis Baggio, 2012-12-03 Each chapter in the book is an individual project and each project is constructed with step by step instructions clearly explained code and includes the necessary screenshots You should have basic OpenCV and C C programming experience before reading this book as it is aimed at Computer Science graduates researchers and computer vision experts widening their expertise **Research**

Anthology on Securing Mobile Technologies and Applications Management Association, Information Resources, 2021-02-05 Mobile technologies have become a staple in society for their accessibility and diverse range of applications that are continually growing and advancing Users are increasingly using these devices for activities beyond simple communication including gaming and e commerce and to access confidential information including banking accounts and medical records While mobile devices are being so widely used and accepted in daily life and subsequently housing more and more personal data it is evident that the security of these devices is paramount As mobile applications now create easy access to personal information they can incorporate location tracking services and data collection can happen discreetly behind the scenes Hence there needs to be more security and privacy measures enacted to ensure that mobile technologies can be used safely Advancements in trust and privacy defensive strategies and steps for securing the device are important foci as mobile technologies are highly popular and rapidly developing The Research Anthology on Securing Mobile Technologies and Applications discusses the strategies methods and technologies being employed for security amongst mobile devices and applications This comprehensive book explores the security support that needs to be required on mobile devices to avoid application damage hacking security breaches and attacks or unauthorized accesses to personal data The chapters cover the latest technologies that are being used such as cryptography verification systems security policies and contracts and general network security procedures along with a look into cybercrime and forensics This book is essential for software engineers app developers computer scientists security and IT professionals practitioners stakeholders researchers academicians and students interested in how mobile technologies and applications are implementing security protocols and tactics amongst devices **Mobile Computing, Applications, and Services** Martin Griss, Guang Yang, 2012-04-23 This

book constitutes the thoroughly refereed post conference proceedings of the Second International Conference on Mobile Computing Applications and Services MobiCASE 2010 held in Santa Clara CA USA during October 25 28 2010 The 15 revised full papers presented were carefully selected from numerous submissions Conference papers are organized in six technical sessions covering the topics of mobile Web and mash ups software engineering and development tools cross layer approaches location based services mobile healthcare and mobile social networking Furthermore the volume includes two workshops on mobile computing and mobile security as well as four poster papers **Keras to Kubernetes** Dattaraj Rao, 2019-05-07 Build a Keras model to scale and deploy on a Kubernetes cluster We have seen an exponential growth in the

use of Artificial Intelligence AI over last few years AI is becoming the new electricity and is touching every industry from retail to manufacturing to healthcare to entertainment Within AI were seeing a particular growth in Machine Learning ML and Deep Learning DL applications ML is all about learning relationships from labeled Supervised or unlabeled data Unsupervised DL has many layers of learning and can extract patterns from unstructured data like images video audio etc em style box sizing border box Keras to Kubernetes The Journey of a Machine Learning Model to Production takes you through real world examples of building DL models in Keras for recognizing product logos in images and extracting sentiment from text You will then take that trained model and package it as a web application container before learning how to deploy this model at scale on a Kubernetes cluster You will understand the different practical steps involved in real world ML implementations which go beyond the algorithms Find hands on learning examples Learn to uses Keras and Kubernetes to deploy Machine Learning models Discover new ways to collect and manage your image and text data with Machine Learning Reuse examples as is to deploy your models Understand the ML model development lifecycle and deployment to production If youre ready to learn about one of the most popular DL frameworks and build production applications with it youve come to the right place *Ubiquitous Information Technologies and Applications* Youn-Hee Han,Doo-Soon Park,Weijia Jia,Sang-Soo Yeo,2012-11-28 Recent advances in electronic and computer technologies have paved the way for the proliferation of ubiquitous computing and innovative applications that incorporate these technologies This proceedings book describes these new and innovative technologies and covers topics like Ubiquitous Communication and Networks Security Systems Smart Devices and Applications Cloud and Grid Systems Service oriented and Web Service Computing Embedded Hardware and Image Processing and Multimedia *Advances in Computing and Intelligent Systems* Harish Sharma,Kannan Govindan,Ramesh C. Poonia,Sandeep Kumar,Wael M. El-Medany,2020-01-03 This book gathers selected papers presented at the International Conference on Advancements in Computing and Management ICACM 2019 Discussing current research in the field of artificial intelligence and machine learning cloud computing recent trends in security natural language processing and machine translation parallel and distributed algorithms as well as pattern recognition and analysis it is a valuable resource for academics practitioners in industry and decision makers **Raspberry Pi 3 Projects for Java Programmers** Pradeeka Seneviratne,John Sirach,2017-05-31 Learn the art of building enticing projects by unleashing the potential of Raspberry Pi 3 using Java About This Book Explore the small yet powerful mini computer in order to run java applications Leverage Java libraries to build exciting projects on home automation IoT and Robotics by leveraging Java libraries Get acquainted with connecting electronic sensors to your Raspberry Pi 3 using Java APIs Who This Book Is For The book is aimed at Java programmers who are eager to get their hands on Raspberry Pi and build interesting projects using java They have a very basic knowledge of Raspberry Pi What You Will Learn Use presence detection using the integrated bluetooth chip Automatic light switch using presence detection Use a centralized IoT service to publish data using RPC

Control a robot by driving motors using PWM Create a small web service capable of performing actions on the Raspberry Pi and supply readings Image capture using Java together with the OpenCV framework In Detail Raspberry Pi is a small low cost and yet very powerful development platform It is used to interact with attached electronics by the use of it s GPIO pins for multiple use cases mainly Home Automation and Robotics Our book is a project based guide that will show you how to utilize the Raspberry Pi s GPIO with Java and how you can leverage this utilization with your knowledge of Java You will start with installing and setting up the necessary hardware to create a seamless development platform You will then straightaway start by building a project that will utilize light for presence detection Next you will program the application capable of handling real time data using MQTT and utilize RPC to publish data to adafruit io Further you will build a wireless robot on top of the zuma chassis with the Raspberry Pi as the main controller Lastly you will end the book with advanced projects that will help you to create a multi purpose IoT controller along with building a security camera that will perform image capture and recognize faces with the help of notifications By the end of the book you will be able to build your own real world usable projects not limited to Home Automation IoT and or Robotics utilizing logic user and web interfaces Style and approach The book will contain projects that ensure a java programmer gets started with building interesting projects using the small yet powerful Raspberry Pi 3 We will start with brushing up your Raspberry Pi skills followed by building 5 6 projects

Handbook of Research on Cloud Infrastructures for Big Data Analytics Raj, Pethuru,Deka, Ganesh

Chandra,2014-03-31 Clouds are being positioned as the next generation consolidated centralized yet federated IT infrastructure for hosting all kinds of IT platforms and for deploying maintaining and managing a wider variety of personal as well as professional applications and services Handbook of Research on Cloud Infrastructures for Big Data Analytics focuses exclusively on the topic of cloud sponsored big data analytics for creating flexible and futuristic organizations This book helps researchers and practitioners as well as business entrepreneurs to make informed decisions and consider appropriate action to simplify and streamline the arduous journey towards smarter enterprises

system that has everything which a computer needs to run like processor and memory and IO Input and Output but in a very small scale Though the point of Embedded system is that it can run in unstable conditions for example in hot weather or under water or places that have enormous shakes or etc On the other hand one of the areas which has been very popular in computer field is photography and image processing Different types of computers can be used based on our requirements to do jobs like noise reduction pattern recognition obtaining 3D pictures and in lots of other fascinating domains Face detection a kind of pattern detection is a pre requirement of face recognition that has enormous usage these days This field has also been considered as one of the most popular research areas since annually more than a thousand of titles published in main engineering and scientific journals are allocated to this area academic databases journals such as Academic Search Premier IEEE Explore SCOPUS and other important databases contain several research works in the field of face detection The two main important issues in face detection processing are time consumption optimization with the intention of reaching highest speed possible while maintaining the second aspect which is an acceptable accuracy of the detection results Thus C and or C++ are employed to do the detection process as fast as possible mainly because they are of good programming languages that are considered close to low level languages in spite the fact that they are high level programming languages Other high level programming languages have not been used in this area due to the fact that they have more latency for execution compared to these two languages One of these popular high level programming languages is Java Java is an object oriented programming language and it has lots of open source libraries that implements different classes for different purposes which can be used by programmers But the main thing that has made Java programming language the most popular one for software developers is that it is platform independent For languages like C or C++ the source code should be compiled for each platform separately consequently the outputs of programs are not guaranteed to be the same for them as well However as programs written in Java run on a virtual machine and this virtual machine itself runs on top of operating systems outputs of the programs are guaranteed to be the same for all of these operating systems Actually the only thing that should be provided is an interpreter which is the JVM Java Virtual Machine installed on top of the OS Operating System According to Barr Frank [1] this virtual machine as an interpreter causes at least ten percent of latency to provide outputs for a program which is written in java compared to the same program that is written in C and or C++ From embedded system point of view it is also an issue as there is no software for JVM provided in this area Fortunately few processors have been developed recently which are able to execute java programs directly on the processor with no need of an interpreter These processors implement JVM in hardware which are mostly soft cores regards to research purpose and sometimes hardcore architecture instead of a JVM application As a result it is expected that the mentioned extra latency which is caused by virtual machine interpreter is avoided for an embedded system that runs java programs through usage of hardware implemented JVMs The aim of this research is to run a face detection application which is implemented by java on a hardware implementation of Java

Virtual Machine JVM in an embedded system and compare it with the PC Personal Computer version of the same program Moreover problems that might occur in whole process will be inspected and analyzed Finally the result will be compared with a couple of other face detectors which was previously proposed by Sim and Yan as their Master of Engineering Thesis First chapter gives a brief introduction towards the whole idea of research A quick history of face detection systems is provided in this chapter and the outline of the thesis is explained as well The second chapter brings an insight over current algorithms of face detection and it is followed by an explanation on the algorithm which has been used in this research in full details Then in third chapter we will talk about Java programming language and Java Virtual Machine and its implementations especially hardware implementation After all in this chapter JOP Java Optimized Processor will be reviewed as a hardware implementation of JVM the manner by which it has been used in this research The forth chapter explains the face detection application which is implemented in Java by one of the open source libraries In the fifth chapter the very same program will be mapped to the JOP and implemented by DE2 115 FPGA board Eventually I will bring future works and possible improvement for the research in the last chapter

Face Recognition for Real Time Application Pradeep Kakkar, 2017-11-27
Master s Thesis from the year 2017 in the subject Engineering Computer Engineering grade 10 course M Tech ECE language English abstract Images containing faces are essential to intelligent vision based human computer interaction and research efforts in face processing include face recognition face tracking pose estimation and expression recognition The rapidly expanding research in face processing is based on the premise that information about a user s identity state and intent can be extracted from images and that computers can then react accordingly e g by knowing person s identity person may be authenticated to utilize a particular service or not A first step of any face processing system is registering the locations in images where faces are present The local binary pattern is a simple yet very efficient texture operator which labels the pixels of an image by thresholding the neighborhood of each pixel and considers the result as a binary number The LBP method can be seen as a unifying approach to the traditionally divergent statistical and structural models of texture analysis Perhaps the most important property of the LBP operator in real world applications is its invariance against monotonic gray level changes caused e g by illumination variations Another equally important is its computational simplicity which makes it possible to analyze images in challenging real time settings The success of LBP in face description is due to the discriminative power and computational simplicity of the LBP operator and the robustness of LBP to mono tonic gray scale changes caused by for example illumination variations The use of histograms as features also makes the LBP approach robust to face misalignment and pose variations For these reasons the LBP methodology has already attained an established position in face analysis research Because finding an efficient spatiotemporal representation for face analysis from videos is challenging most of the existing works limit the scope of the problem by discarding the facial dynamics and only considering the structure Motivated by the psychophysical findings which indicate that facial movements can provide valuable information to face analysis

spatiotemporal LBP approaches for face facial expression and gender recognition from videos were described

When somebody should go to the book stores, search introduction by shop, shelf by shelf, it is in reality problematic. This is why we give the ebook compilations in this website. It will totally ease you to look guide **Android Face Unlock Source Code** as you such as.

By searching the title, publisher, or authors of guide you really want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be every best area within net connections. If you direct to download and install the Android Face Unlock Source Code, it is enormously simple then, before currently we extend the associate to purchase and make bargains to download and install Android Face Unlock Source Code therefore simple!
