Frankenstein's Children Iwan Rhys Morus, 2014-07-14 During the second quarter of the nineteenth century Londoners were enthralled by a strange fluid called electricity In examining this period Iwan Morus moves beyond the conventional focus on the celebrated Michael Faraday to discuss other electrical experimenters who aspired to spectacular public displays of their discoveries Revealing connections among such diverse fields as scientific lecturing laboratory research telegraphic communication industrial electroplating patent conventions and innovative medical therapies Morus also shows how electrical culture was integrated into a new machine dominated consumer society He sees the history of science as part of the history of production and emphasizes the labor and material resources needed to make electricity work *Frankenstein's Children* explains that Faraday with his colleagues at the Royal Society and the Royal Institution looked at science as the province of a highly trained elite who presented their abstract picture of nature only to select groups The book contrasts Faraday's views with those of other practitioners to whom science was a practical skill based activity open to all In venues such as the Galleries of Practical Science electrical phenomena were presented to a public less distinguished but no less enthusiastic and curious than Faraday's audiences William Sturgeon for instance emphasized building apparatus and exhibiting electrical phenomena while chemists instrument makers and popular lecturers supported the London Electrical Society These previously little studied electricians contributed much to the birth of *Frankenstein's children* the not completely benign effects of electricity on a new consumer world Originally published in 1998 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished

backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Fearing the Dark Edmund G. Bansak, 2003-10-09 Cat People 1942 and I Walked with a Zombie 1943 established Val Lewton's hauntingly graceful style where suggestion was often used in place of explicit violence His stylish B thrillers were imitated by a generation of filmmakers such as Richard Wallace William Castle and even Walt Disney in his animated Adventures of Ichabod and Mr Toad 1949 Through interviews with many of Lewton's associates including his wife and son and extensive research his life and output are thoroughly examined

Kinetic Friction Coefficient of Ice Kathryn A. Forland, 1985 This study investigates the relative influence of various parameters on the kinetic friction coefficient μ_k between ice and different surfaces Friction tests were performed with urea doped columnar ice studying the parameters of normal pressure velocity type of material material roughness ice orientation ice hardness and test configuration Tests were conducted by pulling a sample of ice over a sheet of material and by pulling a sample of material over an ice sheet An ambient temperature of 1.5 or 1 deg C was maintained throughout and the ice surface hardness was measured using a specially designed apparatus The results of the friction tests revealed that the behavior of μ_k with varying velocity was significantly influenced by the test configuration and material roughness The magnitude of the kinetic friction coefficient was also affected by varying normal pressure surface roughness and ice hardness Additional guidelines for standardized ice friction tests and future investigations were recommended

21st Century Literacy Renita Schmidt, Paul Lee

Thomas, 2008-11-09 Renita Schmidt and P L Thomas The guiding mission of the teacher education program in the university where we teach is to create teachers who are scholars and leaders While the intent of that mission is basically sound in theory we instill the idea that teachers at all levels are professionals always learning and growing in knowledge that theory that philosophical underpinning does not insure that the students who complete our program are confident about the act or performance of teaching In our unique program students work closely with one teacher and classroom for the entire senior year and then are supervised and mentored during their first semester of teaching the program is heavily field based and it

depends on the effectiveness of mentoring throughout the methods coursework and the first semester of full time teaching. Students tell us this guidance and support is invaluable and yet we feel the disjuncture between university and school just as many of you in more traditional student teaching settings. Students hear best practice information from us in methods classes and they receive ample exposure to the research supporting our field but have a hard time implementing research based practices in their classroom settings and an even harder time finding it in the classrooms around them. *AP English Literature and Composition* Denise Pivarnik-Nova, 2005-12 Focussing on the material that frequently appears on the AP English Literature Exam this title includes practice tests with explanations diagnostic test practice questions proven strategies a review of the relevant material and a glossary of literary terms to help students understand the key concepts.
