revolutionary power of digital media to make songs more widely accessible He started doing data work at the US music intelligence startup The Echo Nest which was soon acquired by Spotify He became Spotify's Data Alchemist His website Every Noise at Once everynoise.com is an unprecedented computational map of the world's music genres Reviews If you want to know anything about how music surfaces today how to find it or how to create it you will find what you need right here And you will be highly entertained and amused in the process Joseph Menn Washington Post staff writer and author of All the Rage The Rise and Fall of Shawn Fanning's Napster We used to sell CDs by the weight of pallets thanks to streaming we know how our content is consumed In this immersive book Glenn has demonstrated what we can do with this knowledge so other industries facing their Napster Moment can learn from his unrivalled first mover advantage Will Page author of Pivot and former Chief Economist of Spotify I'd say that reading this book is the next best thing to having an in depth impassioned hours long fika with Glenn McDonald about music and culture and all of the most burning topics of our time but I'd be lying It's even better This book is a true behind the scenes examination of our culture and our industry from the perspective of someone who was in the thick of it from the beginning It's a history of the streaming era written by someone who made history in the streaming era Meg Tarquinio PhD Spotify Twitch Nettwerk Music Group Throughout McDonald's book personal anecdotes and his own love of music spill out in witty conversational prose Even chapters that delve into streaming's complex finances unsurprisingly your 15 monthly fee does not go directly to your favourite artist but is split between that month's most streamed meaning that megastars such as Swift and Ed Sheeran stay at the top of the pyramid are told in layman's terms Poppie Platt The Daily Telegraph Extract CHAPTER 9 MERCENARIES AND FAN ARMIES Where there's an economic system there's probably fraud This is not a proud truth to admit about humanity but it seems to me to have been consistently historically true Money is supposed to be a bookkeeping mechanism but it becomes a goal Fraud and cheating existed in the music business like any business long before streaming happened Back when charts were based on people reporting sales numbers on phone calls those people could be bribed to say different numbers Radio DJs could be paid to pretend they were playing a song more because they just liked it Accounting could be manipulated Streaming doesn't necessarily make cheating easier overall but it definitely makes it more accessible to introverts Instead of making phone calls you can write computer programs that pretend to be streaming music listeners Piracy maintains a certain dastardly allure Streaming music fraud is not to be brutally honest the most glamorous or profitable form of dastrardry Streaming rewards accumulate in tiny micro transactions and the software necessary to laboriously accumulate micro royalties illegitimately isn't any easier to write than legal software for which you can get paid normal salaries It only really scales if you become a service provider selling fraud as a service and then you're a business with business problems instead of a pirate with a rakish eye patch and the sea air in your hair If you want to cheat your way to riches you're better off trying to do it in junk stocks or cryptocurrencies where there's way too much money sloshing around and the distinction between legitimate behavior and

cheating is fuzzy So you might have thought that fraud wouldn't be a big issue in streaming Buy the book and carry on reading
