Parliament (1994-). National Assembly, 1999 Democratising Local Government, 2002 Local government is at the forefront of development In South Africa the ambitious policy objectives of post apartheid reconstruction and development hinge on the successful creation of a democratic tier of government close to the people An entirely new system of developmental local government has thus been introduced As is the case in many developing countries the responsibilities of municipalities in South Africa have been extended dramatically often without adequate resources Managing municipalities for development therefore requires political will and strategic intervention The book provides a comprehensive introduction to developmental local government It includes the design of the new local government system and the issues posed by decentralisation an overview of specific challenges of urban and rural municipalities a discussion of special issues facing local government including poverty gender and environment new tools for local government including budgeting indicators municipal partnerships and capacity building **Debates of the National Assembly (Hansard)** South Africa. Parliament (1994-). National Assembly, 1997 **Area Repression Report**, 1993 **Debates of the National Council of Provinces (Hansard)** South Africa Parliament (1994-). National Council of Provinces, 1998 Public Opinion on National Priority Issues, March 2000 Stephen P. Rule, 2000 Although the South African economy is generally seen to have sound fundamentals with the high growth potential of an emerging market longer term employment trends remain a cause of concern The number of employment opportunities created during each phase of economic recovery is not keeping pace with the growth of the country s economically active population This places South Africa broadly on a par with international unemployment rates According to the International Labour Organisation ILO some 30% of the world s workforce is either unemployed or underemployed in industrial and developing countries taken together In light of these economic circumstances the attitudes of South Africans to changes in their economic situations over the past year were tested The sentiments about changes in economic circumstances largely reflect the focus of national efforts to promote economic development and social enlistment A comparable pattern emerged when analysing respondents attitudes to changes in the financial situations of their wider households
