The Birth of Development Amy L. S. Staples, Amy L. Sayward, 2006 A comprehensive examination of economic globalization Focused on the creation and evolution of post 1945 internationalist ideology The Birth of Development highlights efforts to diffuse the destructive role of the nation state in world affairs by constructing truly international organizations with global agendas the World Bank the Food and Agriculture Organization and the World Health Organization These organizations and the men and women who worked for them pioneered the advancement of the quality of life for all and established an ongoing obligation to promote worldwide economic development As author Amy Staples reveals the results of their efforts were mixed Grounded in archival research conducted in the archives of the World Bank Food and Agriculture Organization and World Health Organization as well as in other archives in the United States Canada and Great Britain The Birth of Development provides a foundational understanding for many of today's debates on economic globalization especially those that involve the World Bank and World Trade Organization Given the current role of international peacekeepers and multinational aid agencies this story is timely and makes clear that the issues that confronted early postwar planners and reformers remain in many ways unsolved even today The Birth of Development is the only comparative study of these crucial architects of the theory and practice of economic development and it contributes significantly to the ongoing effort to view the postwar period as more than simply an East West Cold War It breaks new ground conceptually and methodologically and will be a welcome addition to the literature in the fields of modern diplomatic history and international relations

The Loneliness of the Black Republican Leah Wright Rigueur, 2016-08-02 The story of black conservatives in the Republican Party from the New Deal to Ronald Reagan Covering more than four decades of American social and political history The Loneliness of the Black Republican examines the ideas and actions of black Republican activists officials and politicians from the era of the New Deal to Ronald Reagan's presidential ascent in 1980 Their unique stories reveal African Americans fighting for an alternative economic and civil rights movement even as the Republican Party appeared increasingly hostile to that very idea Black party members attempted to influence the direction of conservatism not to destroy it but rather to expand the ideology to include black needs and interests As racial minorities in their political party and as political minorities within their community black Republicans occupied an irreconcilable position they were shunned by African American communities and subordinated by the GOP In response black Republicans vocally and at times viciously critiqued members of their race and party in an effort to shape the attitudes and public images of black citizens and the GOP And yet there was also a measure of irony to black Republicans loneliness at various points factions of the Republican Party such as the Nixon administration instituted some of the policies and programs offered by black party members What's more black Republican initiatives such as the fair housing legislation of senator Edward Brooke sometimes

garnered support from outside the Republican Party especially among the black press Democratic officials and constituents of all races Moving beyond traditional liberalism and conservatism black Republicans sought to address African American racial experiences in a distinctly Republican way The Loneliness of the Black Republican provides a new understanding of the interaction between African Americans and the Republican Party and the seemingly incongruous intersection of civil rights and American conservatism British Railways 1948-73 T. R. Gourvish, N. Blake, 1986 Originally published in 1986 this is a business history of the first twenty five years of nationalised railways in Britain Commissioned by the British Railways Board and based on the Board's extensive archives it fully analyses the dynamics of nationalised industry management and the complexities of the vital relationship with government After exploring the origins of nationalisation the book deals with the organisation financial performance investment and commercial policies of the British Transport Commission 1948-2 Railway Executive 1948-53 and British Railways Board 1963-73 Calculations of profit and loss investment and productivity are provided on a consistent basis for 1948-73 This business history thus represents a major contribution not only to the debate about the role of the railways in a modern economy but also to that concerning the nationalised industries which have proved to be one of the most enduring problems of the British economy since the war **Rearming for the Cold War, 1945-1960**

Elliott Vanveltner Converse, 2012 Book Description The first publication in a multivolume series on the history of the acquisition of major weapon systems by the Department of Defense author Elliott Converse presents a meticulously researched overview of changes in acquisition policies organizations and processes within the United States military establishment during the decade and a half following World War II Many of the changes that shaped the nature and course of weapons research and development production and contracting through the end of the century were instituted between 1945 and 1960 many of the problems that have repeatedly challenged defense policymakers and acquisition professionals also first surfaced during these years This study is the first to combine the histories of the Office of the Secretary of Defense OSD and the military services into one account The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods *Studies in Intelligence*, 2013 Pacific Islanders Under German Rule Peter J. Hempenstall, 2016-06-01 This is an important book It is a reprint of the first detailed study of how Pacific Islanders responded politically and economically to their rulers across the German empire of the Pacific Under one cover it captures the variety of interactions between the various German colonial administrations with their separate approaches and the leaders and people of Samoa in Polynesia the major island centre of Pohnpei in Micronesia and the indigenes of New Guinea Drawing on anthropology new Pacific history insights and a range of theoretical works on African and Asian resistance from the 1960s and 1970s it reveals the complexities of Islander reactions and the nature of protests against German imperial rule It casts aside old assumptions that colonised peoples always resisted European colonisers Instead this book argues convincingly that Islander responses were often intelligent and subtle manipulations of their rulers

agendas their societies dynamic enough to make their own adjustments to the demands of empire It does not shy away from major blunders by German colonial administrators nor from the strategic and tactical mistakes of Islander leaders At the same time it raises the profile of several large personalities on both sides of the colonial frontier including Lauaki Namulau ulu Mamoe and Wilhelm Solf in Samoa Henry Nanpei Georg Fritz and Karl Boeder in Pohnpei or Governor Albert Hahl and Po Minis from Manus Island in New Guinea

History of Acquisition in the Department of Defense, Volume 1 Elliott V. Converse, 2012-06-12 This volume is a history of the acquisition of major weapon systems by the United States armed forces from 1945 to 1960 the decade and a half that spanned the Truman and Eisenhower administrations following World War II These instruments of warfare aircraft armored vehicles artillery guided missiles naval vessels and supporting electronic systems when combined with nuclear warheads gave the postwar American military unprecedented deterrent and striking power 1 They were also enormously expensive The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods The first roughly coinciding with President Truman s tenure covers the years from the end of World War II through the end of the Korean War in 1953 The second spans the two terms of the Eisenhower presidency from 1953 through early 1961 The year 1953 marked a natural breakpoint between the two periods The Korean War had ended President Eisenhower and his defense team began implementing the New Look a policy and strategy based on nuclear weapons which they believed would provide security and make it possible to reduce military spending The New Look s stress on nuclear weapons along with the deployment of the first operational guided missiles and the rapid advances subsequently made in nuclear and missile technology profoundly influenced acquisition in the services throughout the 1950s and the remainder of the century As used in this study the term acquisition encompasses the activities by which the United States obtains weapons and other equipment In surveying the history of acquisition between 1945 and 1960 this study discusses or refers in passing to many of the hundreds of weapon system programs initiated by the services in that period but it is not a weapons encyclopedia Instead it investigates a few major programs in depth in the belief that such detailed examination best reveals the evolution of acquisition policies organizations and processes and the various forces influencing weapons programs

Conflict and Crisis Robert J. Donovan, 1996 It was a quiet on the second floor The vice president walked solemnly into Mrs Roosevelt s sitting room where she waited grave and calm With her was her daughter Mrs Anna Roosevelt Boettiger her husband Colonel John Boettiger and Stephan Early Truman knew at a glance that his premonition had been true Mrs Roosevelt came forward directly and put her arm on his shoulder Harry the President is dead Robert J Donovan s Conflict and Crisis presents a

detailed account of Harry S Truman's presidency from 1945-1948 **Papers Available** Foreign Affairs Research Documentation Center, 1969 *Overlord's Eagles* John J. Sullivan, 2005-05-05 On June 6, 1944, the Allies launched Operation Overlord, the largest most hazardous amphibious assault in history. The objective: establishment of a lodgment area in Normandy from which the Allies could strike at the heart of Germany and destroy the German armed forces. Air supremacy over northwest Europe was an absolute prerequisite for the success of the invasion, and to achieve it, the U.S. Army Air Forces launched two campaigns aimed at destroying the Germans' transportation advantages in the area. In the months and days leading up to the assault, the Army Air Forces ceaselessly bombed rail centers, rendering most of the railways in northern France and Belgium unusable. Once the actual invasion was underway, the Allies shifted to an interdiction campaign, using precise air attacks on critical transportation installations near the battlefield to neutralize Germany's efforts to resupply and reinforce their troops. This work makes use of many wartime records that had remained classified until recently. **The Annual Index to The Times**, 1911 **The United States Government manual 1989/90**, 1973 Describes the major departments and agencies of the federal government and lists their officials **The United States Government Manual**, 1997 **United States Government Organization Manual**, 1996 *Divine Agitators* Mark Newman, 2004 The National Council of Churches established the Delta Ministry in 1964 to further the cause of civil rights in Mississippi, the southern state with the largest black population proportionately and with the stiffest level of white resistance. At its height, the Ministry, which was headquartered in Greenville, had the largest field staff of any civil rights organization in the South. Active through the mid-1970s, the Ministry outlasted SNCC, CORE, and the SCLC in Mississippi, helping to fill the vacuums when these organizations fell apart or refocused their energies. In this first book-length study of the Delta Ministry, Mark Newman tells how the organization conducted literacy, citizenship, and vocational training. He documents the Ministry's role in fostering the growth of Head Start and community-based health care and in widening the distribution of free surplus federal food and food stamps. Newman discusses among other Ministry successes the Delta Foundation, which created jobs by channeling grant money to small businesses that could not secure bank loans. At the same time, he details the Ministry's problems, from its chronic underfunding to its uneasy relationship with the Mississippi NAACP, which pursued civil rights objectives through less confrontational methods. Newman examines the Freedom Crafts manufacturing cooperative and other ministry failures, as well as mixed efforts such as Freedom City, a collective agricultural and manufacturing community built by displaced agricultural workers. *Divine Agitators* looks at many inadequately studied events across a time span that extends beyond the widely accepted end dates of the civil rights movement. It offers new insights at the most local levels of the movement: into conflict within and between civil rights groups, the increasing subtlety of white resistance, the disengagement of the federal government, and the rise of Black Power.
