Eduardo Teixeira,Diogo Monteiro,2025-01-06 In recent years there has been a growing recognition of the profound
interconnection between mental health cognition and physiological responses in the context of physical activity exercise and
sports This heightened awareness has prompted a paradigm shift towards embracing a holistic psychophysiological
perspective in research within this field Volume III of this Research Topic delves deeper into the intricate relationship
between psychological factors such as depression anxiety and motivation and their impact on physiological variables during
physical activity exercise and sports performance Through a comprehensive exploration of this multidimensional interplay we
aim to advance our understanding of how cognition education and psychological well being intersect with physiological
responses By examining the nexus of mental health cognition and physiological variables we aim to shed light on the
underlying mechanisms driving performance behaviour and overall well being in athletes and individuals engaged in physical
activity We invite contributors to uncover new insights and pave the way for innovative approaches to enhancing
performance promoting well being and addressing mental health challenges in the realm of physical activity exercise and
