
Unit 6 APES Exam Review Questions with correct Answers 100% correct

Compare a nonrenewable to a renewable energy source - answer Nonrenewable resources exist in a fixed amount and cannot be replaced on a human timescale (Examples: coal, oil, natural gas, nuclear). Renewable resources can be replenished naturally at or near the rate of consumption (Examples: solar, biomass, geothermal, wind, hydropower).

Identify three examples of renewable resources and three examples of nonrenewable resources. - answer Non Renewable- coal, oil, natural gas
Renewable- solar, biomass, geothermal

How do developed and developing countries compare when it comes to energy consumption? Why? - answer Developed countries use more energy because they have more resources too and have more things that need energy consumption compared to developing countries who use other resources besides energy

What type of country (developed or developing) uses more fossil fuels? Why? - answer Developing countries use more fossil fuels because they don't have other resources to create energy like developed countries

Does industrialization lead to high energy consumption rates? Why/why not? - answer Yes, because more industries use energy for lighting and working machines which leads to a lot of energy that is produced in industries and factories

Why is wood fuel commonly used in developing countries? - answer Easy accessibility

What are some environmental concerns with using wood as an energy source? - answer Particle emissions that turn into smog

List three air pollutants that are emitted during the burning of coal. - answer Mercury, lead, sulfur dioxide

Place the following 8 events in chronological order: the oil spill of the Exxon Valdez; the meltdown of the reactor at Chernobyl; the discovery of contamination at Love Canal; The first Earth Day; the leak of methyl isocyanate in Bhopal; the drafting of the Kyoto

Oxytocin's routes in social behavior: into the 21st century. "Precision Medicine" approach for Oxytocin Alaine Keebaugh, Elissar Andari, Lisa A. Parr, 2015-12-21 Our brain is endowed with an incredible capacity to be social to trust to cooperate to be altruistic to feel empathy and love Nevertheless the biological underpinnings of such behaviors remain partially hardwired Seminal research in rodents has provided important insights on the identification of specific genes in modulating social behaviors in particular the arginine vasopressin receptor and the oxytocin receptor genes These genes are involved in

regulating a wide range of social behaviors mother infant interactions social recognition aggression and socio sexual behavior Remarkably we now know that these genes contribute to social behavior in a broad range of species from voles to humans Indeed advances in human non invasive neuroimaging techniques and genetics have enabled scientists to begin to elucidate the neurobiological basis of the complexity of human social behaviors using pharmacological fMRI and imaging genetics Over the past few years there has been a strong interest focused on the role of oxytocin in modulating human social behaviors with translational relevance for understanding neuropsychiatric disorders such as autism schizophrenia and depression in which deficits in social perception and social recognition are key phenotypes The convergence of this interdisciplinary research is beginning to reveal the complex nature of oxytocin s actions For instance the way that oxytocin does influence social functioning is highly related to individual differences in social experiences but also to the inter individual variability in the receptor distribution of this molecule in the brain Remarkably despite the increasing evidence that oxytocin has a key role in regulating human social behavior we still lack of knowledge on the core mechanisms of action of this molecule Understanding its fundamental actions is a crucial need in order to target optimal therapeutic strategies for human social disorders The originality of this Research Topic stands on its translational focus on bridging the gap between fundamental knowledge acquired from oxytocin research in voles and monkeys and recent clinical investigations in humans For instance what are the key animal findings that can import further knowledge on the mechanisms of actions of this molecule in humans What are the key experiences that can be performed in the animal model in order to answer significant science gaps in the treatment of neuropsychiatric disorders Hence within this Research Topic we will review the current state of the field identify where the gaps in knowledge are and propose directions for future research This issue will begin with a comparative review that examines the role of this peptide in diverse animal models which highlights the adaptive value of oxytocin s function across multiple species Then a series of reviews will examine the role of oxytocin in voles primates and humans with an eye toward revealing commonalities in the underlying brain circuits mediating oxytocin s effects on social behavior Next there will be a translational review highlighting the evidence for oxytocin s role in clinical applications in psychopathology Hence via the continuum of basic to translational research areas we will try to address the important gaps in our understanding of the neurobiological routes of social cognition and the mechanisms of action of the neuropeptides that guide our behaviors and decisions

The Global Guide to Animal Protection Andrew

Linzey,2013-06-01 Raising awareness of human indifference and cruelty toward animals The Global Guide to Animal Protection includes more than 180 introductory articles that survey the extent of worldwide human exploitation of animals from a variety of perspectives In addition to entries on often disturbing examples of human cruelty toward animals the book provides inspiring accounts of attempts by courageous individuals including Jane Goodall Shirley McGreal Birute Mary Galdikas Richard D Ryder and Roger Fouts to challenge and change exploitative practices As concern for animals and their

welfare grows this volume will be an indispensable aid to general readers activists scholars and students interested in developing a keener awareness of cruelty to animals and considering avenues for reform Also included is a special foreword by Archbishop Desmond Tutu urging readers to seek justice and protection for all creatures humans and animals alike
