2014 Grade 11 Economics Paper 2 Memo:

Class and Group Actions in Arbitration Bernard Hanotiau, Eric A. Schwartz, 2016-09-23 Several decades ago a typical arbitration would involve one claimant against one respondent. Over the years more and more cases involve several claimants against several respondents. Today one third of all international ICC arbitrations seem to involve multiparty cases, multi contract cases involving multiple contracts, multiple parties. The evolution has continued and the debate today is whether it would be possible for a class of people in the same situation or a group of citizens having the same interest to start one single arbitration procedure as a group or as a class. This publication examines the complex issues involved in class or group arbitration on a comparative law basis. Is there a place for such proceedings within the framework of the arbitration process? Class action procedures as developed in the United States court system and more recently in Canada are almost nonexistent in Europe. The European Commission has advocated collective redress as an important means of access to justice but class actions have found little enthusiasm in the Member States. The book highlights the lessons which have been learned from the experience of cases in the US and in Europe. What does the future hold for class, collective and mass arbitrations? Are they a marginal phenomenon or has their potential yet to be realized? What are possible solutions to the issues that have been encountered? Can we expect to see more of such arbitrations in the future? Written by arbitrators, academics and practitioners, this Dossier will provide the answers to these questions and many more. *The Permission Society* Timothy

Sandefur, 2016-09-13 Throughout history kings and emperors have promised freedoms to their people. Yet these freedoms were really only permissions handed down from on high. The American Revolution inaugurated a new vision: people have basic rights to life, liberty and the pursuit of happiness and government must ask permission from them. Sadly today's increasingly bureaucratic society is beginning to turn back the clock and to transform America into a nation where our freedoms—the right to speak freely, to earn a living, to own a gun, to use private property, even the right to take medicine to save one's own life—are again treated as privileges the government may grant or withhold at will. Timothy Sandefur examines the history of the distinction between rights and privileges that played such an important role in the American experiment and how we can fight to retain our freedoms against the growing power of government. Illustrated with dozens of real life examples including many cases he litigated himself, Sandefur shows how treating freedoms as government created privileges undermines our Constitution and betrays the basic principles of human dignity. *Shadow Networks* Francisco

Louçã, Michael Ash, 2018-10-03 The 2007-08 financial crisis surprised many economists and the public. But how did the crisis come about? Why was it so deep and why has the clean up been so slow and painful? Many accounts of the crisis focus on renegade activity in marginal financial sectors. *Shadow Networks* challenges this pervading view and sets out to demonstrate that far from a dissident branch, the shadow finance that initiated the crisis is tightly networked with and highly profitable for bank based finance. The collapse was not an accident but baked into the system of finance from the start. *Shadow Networks*
