Daily Graphic Ransford Tetteh, 2014-04-09 *The Economics and Law of Public Procurement* Annalisa Castelli, Gustavo Piga, Tünde Tátrai, 2024-12-11 Public procurement makes up a significant part of national economies 10-25% of gross domestic product GDP depending on the country. Appropriate laws and regulations are an essential tool to direct the action of procurers towards the public good and avoid corruption and misallocation of resources while at the same time sustaining progress and social goals. The original approach of this book combines juridical, economic and technical expertise to find common terrain and a common language in order to debate the specific issues that affect public administrations across the world that need advancing and modernizing. The book features contributions across four specific themes of interest to the procurer's day to day job in modern public purchasing organizations: preferences and political economy in public procurement, climate change, defence procurement and human rights in public procurement. The aim is to let the new emerging trade offs between competition and sustainability emerge, highlighting at the same time the possible synergies between the relevant policy objectives. The book takes into account sectoral specificities reinforced by recent global events such as wars, natural disasters and populism. The unique format features in each section an interdisciplinary debate between two experts across different disciplines who deliberate and engage one another so as to improve the mutual understanding across disciplines, followed by two additional contributions. This book will be of interest to scholars, researchers and policymakers worldwide.

EFA Global Monitoring Report - 2013-2014 - Teaching and Learning: Achieving quality for all UNESCO, 2014-02-04. The 2013-2014 Education for All Global Monitoring Report shows that a lack of attention to education quality and a failure to reach the marginalized have contributed to a learning crisis that needs urgent attention. Worldwide 250 million children, many of them from disadvantaged backgrounds, are not learning the basics. Teaching and Learning: Achieving Quality for All describes how policy makers can support and sustain a quality education system for all children regardless of background by providing the best teachers. The Report also documents global progress in achieving Education for All goals and provides lessons for setting a new education agenda post 2015. In addition, the Report identifies that insufficient financing is hindering advances in education.

Redesigning Manufacturing M. Beverland, B. Nielsen, V. Pryce, Ellen Hellmann, 2015-05-13. Manufacturing in the UK has an image problem. Although this image problem is more fiction than fact, it nonetheless has an impact on the sector's ability to attract staff, capital and policy interest. This book redresses this situation by focusing on the real successes of the sector and the strategies used by makers to achieve sustainable results.
