Children's Lives: Contributions of the Narrative Mode to Early Childhood Development, Literacy, and Learning

Kelli Jo Kerry-Moran, Juli-Anna Aerila, 2019-09-27 This book is based on the power of stories to support children in all areas of their lives. It examines the role narratives can play in encouraging growth in contexts and domains such as personal and family identity, creative movement, memory and self-concept, social relationships, or developing a sense of humor. Each chapter describes innovative and research-based applications of narratives such as movement stories, visual narratives to develop historical thinking, multimodal storytelling, bibliotherapy, mathematics stories, family stories, and social narratives. The chapters elaborate on the strength of narratives in supporting the whole child in diverse contexts, from young children on the autism spectrum improving their social skills at school to four and five year olds developing historical thinking to children who are refugees or asylum seekers dealing with uncertainty and loss. Written by accomplished teachers, researchers, specialists, teaching artists, and teacher educators from several countries and backgrounds, the book fills a gap in the literature on narratives. This work delves into the topic of narratives in young children's lives with a breadth of topics and depth of study not found elsewhere. Collectively, the insights of the contributors build a convincing case for emphasizing story across the various disciplines and developmental domains of the early childhood years. The writing style is scholarly yet accessible. Authors used a wide array of visual material to make their points clearer and show the reader what meaningful uses of story look like. Mary Renck Jalongo, Journal and Book Series Editor, Springer, Indiana, PA, USA. *The Education of d/Deaf and Hard of Hearing Children*, Peter V. Paul, 2020-02-12 A significant number of d/Deaf and hard of hearing d/Dhh children and adolescents experience challenges in acquiring a functional level of English language and literacy skills in the United States and elsewhere. To provide an understanding of this issue, this book explores the theoretical underpinnings and synthesizes major research findings. It also covers critical controversial areas such as the use of assistive hearing devices, language and literacy assessments, and inclusion. Although the targeted population is children and adolescents who are d/Dhh, contributors found it necessary to apply our understanding of the development of English in other populations of struggling readers and writers such as children with language or literacy disabilities and those for whom English is not the home language. Collectively, this information should assist scholars in conducting further research and enable educators to develop general instructional guidelines and strategies to improve the language and literacy levels of d/Dhh students. It is clear that there is not a one-size-fits-all concept, but rather research and instruction should be differentiated to meet the needs of d/Dhh students. It is our hope that this book stimulates further theorizing and research and most importantly offers evidence and reason-based practices for improving language and literacy abilities of d/Dhh students. *Interdisciplinary Research and Innovation in Bilingual and Second Language Teacher Education*, M. Dolores Ramírez-Verdugo, 2024-04-12 The book provides a comprehensive overview of international pedagogical approaches, research, innovation, experiences, and best practices in bilingual and second language education to enhance bilingual teacher education programs.
