

MATHEMATICS SYLLABUS D

Paper 4024/11
Paper 11

Key messages

To do well in this paper, candidates need to

- be familiar with all the syllabus content
- be able to carry out basic calculations without a calculator
- understand and use correct mathematical terminology
- draw and interpret graphs and diagrams
- apply mathematical techniques to solve problems
- set out their work in clear, logical steps.

General comments

Many candidates presented their work well with workings set out legibly and answers clearly stated on the answer line. Most used the appropriate geometrical instruments correctly to draw and take measurements from diagrams.

Many candidates demonstrated sound basic arithmetic skills, although errors were seen when working with decimals or working with numbers written in standard form. Candidates often demonstrated good algebraic skills, although care should be taken when forming equations in the context of graphs or vectors.

Candidates should be encouraged to recognise the difference between expressions and equations. For example, candidates attempted to solve expressions by adding an '=0' to the end of the expression.

Candidates should take care to present work carefully and should ensure that numbers such as 1, 4 and 7 can be clearly distinguished. They should cross out and replace work if they have made errors rather than overwriting as this cannot be read clearly. They should show their method for a question in the working space for that question: if work continues elsewhere, this should be referred to in the working space for the question and the additional work must be clearly labelled with the relevant question number.

Comments on specific questions

Question 1

- (a) Many good responses were seen to this part. One less successful approach seen was the multiplication of the numerator and denominator by 10; often no further working was given in these cases beyond the initial step.
- (b) Again, many good responses were seen to this part. Some incorrect answers were 28, 32 and 2400.

Question 2

- (a) Many candidates wrote down the correct area shaded. A variety of incorrect answers were seen including $\frac{1}{9} \cdot \frac{4}{9} \cdot \frac{5}{9} \cdot \frac{2}{3}$ and $\frac{3}{2}$.
- (b) This part was also usually well done. Incorrect answers included 0.1 and 2.5.
