Information Engineering and Education Science Dawei Zheng, 2015-04-30 This proceedings volume contains selected papers presented at the 2014 International Conference on Information Engineering and Education Science ICIEES 2014 held June 12 13 in Hong Kong China The objective of ICIEES 2014 was to provide a platform for researchers engineers academics as well as industry professionals from all over the world to *The First Century of the Baccalauréat Exam* Samira

ElAtia, 2025-03-27 A lasting and longstanding legacy from the Napoleon Bonaparte era the Baccalauréat exam is one of France's landmark educational institutions Through its evolution of over 200 years the Baccalauréat has been a mirror to societal and historical eras This book hones in on the first century of the life of the exam Through an analysis of legal texts that shaped education in France the book traces this evolution within the changing social and political landscape of the country Steeped in the ideals of meritocracy the Bac morphed from a single oral exam optional in nature into a complex and standardized battery of tests administered across France and its former colonies and territories by the early 20th century In 1902 with educational reforms in France that made it Free Mandatory and Secular for all the Baccalauréat anchored its position as the predestined check for the country to channel its academic elite Slow Burn R. Jisung Park, 2025-07-29 How the subtle but significant consequences of a hotter planet have already begun from lower test scores to higher crime rates

and how we might tackle them today It s hard not to feel anxious about the problem of climate change especially if we think of it as an impending planetary catastrophe In *Slow Burn* R Jisung Park encourages us to view climate change through a different lens one that focuses less on the possibility of mass climate extinction in a theoretical future and more on the everyday implications of climate change here and now Drawing on a wealth of new data and cutting edge economics Park shows how climate change headlines often miss some of the most important costs When wildfires blaze what happens to people downwind of the smoke When natural disasters destroy buildings and bridges what happens to educational outcomes Park explains how climate change operates as the silent accumulation of a thousand tiny conflagrations imperceptibly elevated health risks spread across billions of people pennies off the dollar of productivity fewer opportunities for upward mobility By investigating how the physical phenomenon of climate change interacts with social and economic institutions Park illustrates how climate change already affects everyone and may act as an amplifier of inequality Wealthier households and corporations may adapt quickly but without targeted interventions less advantaged communities may not Viewing climate change as a slow and unequal burn comes with an important silver lining It puts dollars and cents behind the case for aggressive emissions cuts and helps identify concrete steps that can be taken to better manage its adverse effects We can begin to overcome our climate anxiety Park shows us when we begin to tackle these problems locally
