Basic and applied research on deception and its detection Wolfgang Ambach, Matthias Gamer, 2014-08-07 Deception is a ubiquitous phenomenon in social interactions and has attracted a significant amount of research during the last decades The majority of studies in this field focused on how deception modulates behavioral autonomic and brain responses and whether these changes can be used to validly identify lies Especially the latter question which historically gave rise to the development of psychophysiological lie detection techniques has been driving research on deception and its detection until today The detection of deception and concealed information in forensic examinations currently constitutes one of the most frequent applications of psychophysiological methods in the field With the increasing use of such methods the techniques for detecting deception have been controversially discussed in the scientific community It has been proposed to shift from the original idea of detecting deception per se to a more indirect approach that allows for determining whether a suspect has specific knowledge of crime related details This so called Concealed Information Test is strongly linked to basic psychological concepts concerning memory attention orienting and response monitoring Although research in this field has intensified with the advancement of neuroimaging techniques such as PET and fMRI in the last decade basic questions on the psychological mechanisms underlying modulatory effects of deception and information concealment on behavioral autonomic and brain responses are still poorly understood This Research Topic brings together contributions from researchers in experimental psychology psychophysiology and neuroscience focusing on the understanding of the broad concept of deception including

the detection of concealed information with respect to basic research questions as well as applied issues This Research Topic is mainly composed of original research articles but reviews and papers elaborating on novel methodological approaches have also been included Experimental methods include but are not limited to behavioral autonomic electroencephalographic or brain imaging techniques that allow for revealing relevant facets of deception on a multimodal level While this Research Topic primarily includes laboratory work relevant issues for the field use of such methods are also discussed Deception Robert M. Clark, William L. Mitchell, 2018-01-12 Bridging the divide between theory and practice Deception Counterdeception and Counterintelligence provides a thorough overview of the principles of deception and its uses in intelligence operations This masterful guide focuses on practical training in deception for both operational planners and intelligence analysts using a case based approach Authors Robert M Clark and William L Mitchell draw from years of professional experience to offer a fresh approach to the roles played by information technologies such as social media By reading and working through the exercises in this text operations planners will learn how to build and conduct a deception campaign and intelligence analysts will develop the ability to recognize deception and support deception campaigns Key Features New channels for deception such as social media are explored to show you how to conduct and detect deception activities through information technology Multichannel deception across the political military economic social infrastructure and information domains provides you with insight into the variety of ways deception can be used as an instrument for gaining advantage in conflict Contemporary and historical cases simulate real world raw intelligence and provide you with opportunities to use theory to create a successful deception operation A series of practical exercises encourages you to think critically about each situation The exercises have several possible answers and conflicting raw material is designed to lead readers to different answers depending on how the reader evaluates the material Individual and team assignments offer you the flexibility to proceed through the exercises in any order and assign exercises based on what works best for the classroom setup **Regrettable Relatives** Rev Emmanuel Oghene-Emmanuel, 2021-10-25 There have been all sorts of relatives since the time of Cain and Abel Joseph and his elder brothers Laban against Jacob as well as Esau and Jacob As things turned out David wished his nephews the sons of Zeruiah one of his sisters had not joined his army They had a lusty craving for violence without reverence for God and immediate reality whereas David revered God above anything else You and I need God to shield us from the troubles that relatives constitute Some are more of a curse than a blessing
