From the Civil War to the Progressive Era diverse political movements across tobacco's commodity chain drove state and market development creating the immense power and stifling poverty that defined tobacco's reconstruction. The Political Reconstruction of American Tobacco 1862-1933 emphasizes the significance of the thousands of manufacturers whose interest groups shaped federal tax policy and in turn forged a powerful and effective internal revenue system; the increasingly influential fertilizer producers and warehouse operators who determined tobacco's value; and the crop scientists who sought to promote and rationalize US tobacco production. As these actors reshaped tobacco's commodity chain they missed and even dismissed the interests of tobacco growers especially newly emancipated African Americans and smallholding whites throughout the South. The ruling logic of tobacco's reconstructed political economy rationalized agrarian indebtedness justified low prices and intensified labor discipline on thousands of small farms. In emphasizing these exclusions The Political Reconstruction of American Tobacco 1862-1933 reveals how nineteenth century state and economic development coincided with and even created rural poverty.

Politics in Georgia Robert M. Howard, Arnold Fleischmann, Richard N. Engstrom, 2017-10-15 This new edition has been extensively updated to reflect developments in Georgia politics and government since 2007 a decade that has seen three presidential election cycles two midterm elections and a census. Updates reflect not only changes in how Georgia is governed but also the economic and social trends helping to drive those changes. These include the continued growth and dispersal of Hispanic and Asian populations the decline by a variety of measures of rural areas and the moderating effect of probusiness government factions on social conservative agendas. This edition maintains the book's comparative approach which examines the state from three revealing perspectives. This allows readers to determine the extent to which Georgia is similar to its peers on such topics as the length and features of the constitution the organization of the state government and the nature of policies. All this allows students and scholars to have a better understanding of the political and economic dynamics of Georgia and the relationship of those dynamics to national political and economic developments. The result is a thorough up to date resource on Georgia's dynamic political system. Features: Coverage of trends and events since the prior edition appeared in 2007. Analysis of the most recent state elections. A rewritten chapter on the judiciary that reflects greater representation of women and minorities on the bench and a sharp rise in Republican appointees. A rewritten chapter on policy with added detail on such topics as transportation the environment education social welfare and public safety and security. Extensive revisions to sections on the U S Constitution. The removal of a chapter on public opinion so that its contents can be more tightly woven throughout the book. Greater attention to the increased power of interest groups. Acknowledgment throughout of the impact of the web and social media in politics and government.

Conservative Philanthropies and Organizations Shaping U.S. Educational Policy and Practice

Kathleen deMarrais,Brigette A. Herron,Janie Copple,2020-09-10 American public education has been under assault for the last few decades as a broken system that needs a complete overhaul In large part these opinions are offered by people and organizations who know little about schools But who are these influencers This book is about conservative philanthropies the organizations and individuals within their networks and the strategies they use to shape educational policy and practice in K 12 and higher education Each chapter examines a philanthropy philanthropic network or corporation focused on pushing an agenda of individualism privatization and conservative ideologies Based in extensive research including the tax filings of specific philanthropic foundations the authors demonstrate how the philanthropic elite work within federal state and local governmental contexts to influence policy and practice Within a global context of increasing wealth inequality the authors question the motivations of these privileged few to withhold tax dollars from the US treasury where duly elected representatives can determine how tax dollars are used to benefit society By allowing these philanthropic organizations tax exemptions under the guise of assumed benevolence are citizens giving up their ability to hold these organizations accountable for how the money is spent This book aimed at a general audience of educators provides the in depth knowledge necessary to understand and resist private control of public policies and institutions
