The Huguenots and French Opinion, 1685-1787 Geoffrey Adams, 2006-01-01 The decision of Louis XIV to revoke the Edict of Nantes and thus liquidate French Calvinism was well received in the intellectual community which was deeply prejudiced against the Huguenots This antipathy would gradually disappear After the death of the Sun King a more sympathetic view of the Protestant minority was presented to French readers by leading thinkers such as Montesquieu the abbé Prévost and Voltaire By the middle years of the eighteenth century liberal clerics lawyers and government ministers joined Encyclopedists in urging the emancipation of the Reformed who were seen to be loyal peaceable and productive Then in 1787 thanks to intensive lobbying by a group which included Malesherbes Lafayette and the future revolutionary Rabaut Saint-Pierre the government of Louis XVI issued an edict of toleration which granted the Huguenots a modest bill of civil and religious rights Adams' illuminating work treats a major chapter in the history of toleration it explores in depth a fascinating shift in mentalities and it offers a new focus on the process of reform from above in pre-Revolutionary France

Emotions in Non-Fictional Representations of the Individual, 1600-1850 Malina Stefanovska, Yinghui Wu, Marie-Paule de Weerd-Pilorge, 2022-01-01

This book addresses the distinct representations of emotions in non-fictional texts from the seventeenth to the mid-nineteenth century 1600-1850. Focusing on memoirs, autobiographies, correspondences, and conduct manuals, it argues that in those writings passions and emotions are differently expressed than in fiction. It also offers a comparative study of texts from cultures as diverse as English, French, Korean, and Chinese, and of emotions in relation to genre, identity, and morality during significant cultural transformation of the early modern period. This book is distinctive in its choice of non-fictional genres, its period, and its cross-cultural approach. It can benefit scholars interested in exploring emotion as a historical and cultural product and in enriching their knowledge of an emerging scholarly direction: studies in self-narratives, autobiography, memoirs, dream narratives, letters, etc., often insufficiently explored in earlier historical periods.

The Encyclopaedia Britannica, 1894 The Collapse of Mechanism and the Rise of Sensibility Stephen Gaukroger, 2010-11-25. Understanding the emergence of a scientific culture, one in which cognitive values generally are modelled on or subordinated to scientific ones, is one of the foremost historical and philosophical problems with which we are now confronted. The significance of the emergence of such scientific values lies above all in their ability to provide the criteria by which we come to appraise cognitive enquiry and which shape our understanding of what it can achieve. The period between the 1680s and the middle of the eighteenth century is a very distinctive one in this development. It is then that we witness the emergence of the idea that scientific values form a model for all cognitive claims. It is also at this time that science explicitly goes beyond technical expertise and begins to articulate a world view designed to displace others, whether humanist or Christian. But what occurred took place in a peculiar and overdetermined fashion, and the outcome in the mid-eighteenth century was not the triumph of reason as has commonly been supposed, but rather a simultaneous elevation of the standing of science and the beginnings of a serious questioning of whether science offers a comprehensive form of understanding. The Collapse of Mechanism and the Rise of Sensibility is the sequel to Stephen Gaukroger's acclaimed 2006 book The Emergence of a Scientific Culture. It offers a rich and fascinating picture of the development of intellectual culture in a period where understandings of the natural realm began to fragment.
