The rest of this page is about the first vehicle, or Unit, involved in the crash. The report documents the vehicle identification number (VIN), driver's contact information and license information, and what, if any, damage the vehicle sustained. Any citations given to the driver are also documented here, as are the driver's known injuries. If the driver was tested for drugs or alcohol, that too is documented here.

Any passengers in the first vehicle are listed in the Passengers section, including names, contact information, and level of injury. Injured passengers are listed first. There is additional space below to include contact information for the vehicle owner (if not the driver), any uninjured passengers, and witnesses.

Human-Computer Interaction

Andrew Sears, Julie A. Jacko, 2009-03-02. Hailed on first publication as a compendium of foundational principles and cutting edge research, *The Human Computer Interaction Handbook* has become the gold standard reference in this field. While human computer interaction may have emerged from within computing, significant contributions have come from a variety of fields including industrial engineering, psychology, education, and graphic design. Nowhere is this more apparent than when designing solutions for users as diverse as children, older adults, and individuals with physical, cognitive, visual, or hearing impairments. Derived from select chapters in *The Human Computer Interaction Handbook*, this volume emphasizes design for these groups and also discusses HCI in the context of specific domains including healthcare, games, and the aerospace industry.
