classrooms not to mention boardrooms and factory floors a mixture of ethnicities races genders and religious affiliations But these changes in academic and economic opportunities have not directly translated into an elimination of group disparities in academic performance career opportunities and levels of advancement Standard explanations for these disparities which are vehemently debated in the scientific community and popular press range from the view that women and minorities are genetically endowed with inferior abilities to the view that members of these demographic groups are products of environments that frustrate the development of the skills needed for success Although these explanations differ along a continuum of nature vs nurture they share in common a presumption that a large chunk of our population lacks the potential to achieve academic and career success In contrast to intractable factors like biology or upbringing the research summarized in this book suggests that factors in one's immediate situation play a critical yet underappreciated role in temporarily suppressing the intellectual performance of women and minorities creating an illusion of group differences in ability Research conducted over the course of the last fifteen years suggests the mere existence of cultural stereotypes that assert the intellectual inferiority of these groups creates a threatening intellectual environment for stigmatized individuals a climate where anything they say or do is interpreted through the lens of low expectations This stereotype threat can ultimately interfere with intellectual functioning and academic engagement setting the stage for later differences in educational attainment career choice and job advancement

Occupational Outlook Handbook, 2008 *The Integration Debate* Chester Hartman, Gregory Squires, 2009-09-11 Racial integration and policies intended to achieve greater integration continue to generate controversy in the United States with some of the most heated debates taking place among long standing advocates of racial equality Today many nonwhites express what has been referred to as integration exhaustion as

they question the value of integration in today's world And many whites exhibit what has been labeled race fatigue arguing that we have done enough to reconcile the races Many policies have been implemented in efforts to open up traditionally restricted neighborhoods while others have been designed to diversify traditionally poor often nonwhite neighborhoods Still racial segregation persists along with the many social costs of such patterns of uneven development This book explores both long standing and emerging controversies over the nation's ongoing struggles with discrimination and segregation More urgently it offers guidance on how these barriers can be overcome to achieve truly balanced and integrated living patterns
