programme was designed appeal to the wide range of interests represented by ADG members The meeting was attended

by delegates from all over the world including medical microbiologists veterinarians dentists biochemists geneticists and

scientists from several other disciplines all of whom share a common interest in anaerobic microorganisms The interchange of

scientific information and ideas between the delegates in such pleasant surroundings was as always a valuable and

rewarding experience Unlike previous Biennial Symposia in the series this meeting was sponsored by a number of companies

rather than by a single sponsor Despite some initial concern by the organising committee this arrangement worked well and

we are extremely grateful to all the companies who supported the meeting so generously The names of the sponsors are

listed individually in the acknowledgements section We were also very pleased to welcome those companies who took part in

Starr, H. Stolp, H.G. Trüper, A. Balows, H.G. Schlegel, 2013-11-11 The purpose of this brief Foreword is to make you the reader hungry for the scientific feast that follows These two volumes on the prokaryotes offer a truly unique scientific menu a comprehensive assembly of articles exhibiting the biochemical depth and remarkable physiological and morphological diversity of prokaryote life The size of the volumes might initially discourage the unprepared mind from being attracted to the study of prokaryote life for this landmark

assemblage thoroughly documents the wealth of present knowledge But in confronting the reader with the state of the art the Handbook also defines where new work needs to be done on well studied bacteria as well as on unusual or poorly studied organisms There are basically two ways of doing research with microbes A classical approach is first to define the phenomenon to be studied and then to select the organism accordingly Another way is to choose a specific organism and go where it leads The pursuit of an unusual microbe brings out the latent hunter in all of us The intellectual challenges of the chase frequently test our ingenuity to the limit Sometimes the quarry repeatedly escapes but the final capture is indeed a wonderful experience For many of us these simple rewards are sufficiently gratifying so that we have chosen to spend our scientific lives studying these unusual creatures
