Subject Guide to Books in Print ,1993 **Systematic and Optimization-Based Synthesis and Design of Chemical Processes** Sebastian Recker,2017 In industrial practice conceptual process design is typically conducted by repetitive simulation studies which require detailed design specifications in an early design phase Guided by heuristics these iterative solution procedures result in high manual effort and in addition no guarantee concerning the quality of the solution can be given Optimization based design methods provide a tremendous potential to accelerate and improve conceptual process design For this purpose a synthesis framework for the optimization based design of chemical processes is presented in this thesis Powerful shortcut and rigorous evaluation methods for reaction and distillation are presented These methods are computationally efficient in order to allow an optimization based design of large scale chemical processes Various industrial case studies illustrate the application of the novel approaches and highlight their benefits **Energy Research Abstracts** ,1980 *Product and Process Design Principles* Warren D. Seider,Daniel R. Lewin,J. D. Seader,Soemantri Widagdo,Rafiqul Gani,Ka Ming Ng,2016-05-17 The new 4th edition of Seider s Product and Process Design Principles

Synthesis Analysis and Design covers content for process design courses in the chemical engineering curriculum showing how process design and product design are inter linked and why studying the two is important for modern applications A principal objective of this new edition is to describe modern strategies for the design of chemical products and processes with an emphasis on a systematic approach This fourth edition presents two parallel tracks 1 product design and 2 process design with an emphasis on process design Process design instructors can show easily how product designs lead to new chemical processes Alternatively product design can be taught in a separate course subsequent to the process design course
