paleoecology and systematics toward an understanding of great ape intelligence. Leading scholars from all these fields have been asked to evaluate the manner in which each of their topics of research inform our understanding of the evolution of intelligence in great apes and humans. The ideas thus assembled represent a comprehensive survey of the various causes and consequences of cognitive evolution in great apes. The *Evolution of Thought* will therefore be an essential reference for graduate students and researchers in evolutionary psychology, paleoanthropology and primatology.

Ornithology, Evolution, and Philosophy Jürgen Haffer, 2007-08-16 This book is the first detailed biography of Ernst Mayr. He was an architect of the Synthetic Theory of Evolution and the greatest evolutionary biologist since Charles Darwin, influential historian and philosopher of biology, outstanding taxonomist and ornithologist and naturalist. He is one of the most widely known biologists of the 20th century. Mayr used the theories of natural selection and population thinking as theoretical models within the framework of historical biological studies. He was the first to emphasize the role of biopopulations, thereby pointing out the basic difference between population thinking and typological essentialism.

Principles of Human Evolution Robert Andrew Foley, Roger Lewin, 2013-05-03 *Principles of Human Evolution* presents an in-depth introduction to paleoanthropology and the study of human evolution. Focusing on the fundamentals of evolutionary theory and how these apply to ecological, molecular, genetic, paleontological and archeological approaches to important questions in the field, this timely textbook will help students gain a perspective on human evolution in the context of modern biological thinking. The second edition of this successful text features the addition of Robert Foley, a leading researcher in Human Evolutionary Studies, to the writing team. Strong emphasis on evolutionary theory, ecology and behavior, and scores of new examples reflect the latest evolutionary theories and recent archaeological finds. More than a simple update, the new edition is organized by issue rather than chronology, integrating behavior, adaptation and anatomy. A new design and new figure references make this edition more accessible for students and instructors. New author Robert Foley, leading figure in Human Evolutionary Studies, joins the writing team. Dedicated website www.blackwellpublishing.com/lewin provides study resources and artwork downloadable for Powerpoint presentations. Beyond the Facts boxes explore key scientific debates in greater depth. Margin Comments indicate the key points in each section. New emphasis on ecological and behavioral evolution in keeping with modern research. Fully up to date with recent fossil finds and interpretations. Integration of genetic and paleoanthropological approaches.
