Ancestors In Search Of Human Origins:

Ancestors Charles Brownson, 1983 In Search of Human Evolution Michael H. Crawford, 2024 In Search of Human Evolution focuses on sources of funding and fieldwork in Mexico Siberia Hungary and the Aleutian Islands It reviews how the evolutionary questions were generated grant proposals submitted to specific agencies and permissions obtained from each country and community This book also includes information on how the field research was organized data collected and graduate students and post docs trained The results of each of these investigations were statistically analysed and summarized *Disinformation Guide to Ancient Aliens, Lost Civilizations, Astonishing Archaeology & Hidden History* Preston Peet, 2013-01-01 If you think the history you were taught in school was accurate you re in for a big surprise This group of researchers blows the lid off everything you thought you knew about the origins of the human race and the culture we live in Cover p 4 *Connecting with Our Ancestors: Human Evolution Museum Experiences* Shelley L. Smith, 2024-09-29 This book combines documentation and analysis of the contents of exhibits in 12 museums Part 1 with interviews with experts involved in the creation of exhibits Part 2 to explore variation in human evolution exhibits To be successful museum exhibits must make a personal connection with visitors inspiring them to learn more Human evolution exhibits thus need contemporary relevance It is crucial to find ways to bind our deep past to our lives today Presenting our story and our collective history some human evolution exhibits reach an audience of millions each year An understanding of evolution is fundamental to modern biology and a lack of knowledge of basic principles has practical consequences including impairing reception of health messages The goal of the volume is to stimulate discussion of how the presentation of evolution and in particular human evolution can be improved contributing to scientific literacy and engagement with evolutionary science To enhance relevance to a broader public the author argues that incorporation of evolutionary medicine and clearer explanations of ancestry and human biological variation are needed The surveyed museums include four in Texas the author s home state seven additional renowned U S museums and the Natural History Museum in London Some of the 35 interviewees are prominent academic researchers other contribute their expertise in design art and education Topics discussed include exhibit content and changing exhibits the ideal vs reality in exhibit creation self assessments of exhibits education and edutainment and exhibit content intersections with religion politics and the history of representations of race human biological variation A bibliographic essay appendices and text boxes provide additional information for readers desiring more in depth study This volume is of interest to a wide range of readers in anthropology museum studies and science communication *Ancestors and Relatives* Eviatar Zerubavel, 2011-10-15 Genealogy has long been one of humanity s greatest obsessions But with the rise of genetics and increasing media attention to it through programs like Who Do You Think You Are and Faces of America we are now told that genetic markers can definitively tell us who we are and where we came from The problem writes Eviatar Zerubavel is that biology does not provide us with the full picture After all he asks

why do we consider Barack Obama black even though his mother was white Why did the Nazis believe that unions of Germans and Jews would produce Jews rather than Germans In this provocative book he offers a fresh understanding of relatedness showing that its social logic sometimes overrides the biological reality it supposedly reflects In fact rather than just biological facts social traditions of remembering and classifying shape the way we trace our ancestors identify our relatives and delineate families ethnic groups nations and species Furthermore genealogies are more than mere records of history Drawing on a wide range of evidence Zerubavel introduces such concepts as braiding clipping pasting lumping splitting stretching and pruning to shed light on how we manipulate genealogies to accommodate personal and collective agendas of inclusion and exclusion Rather than simply find out who our ancestors were and identify our relatives we actually construct the genealogical narratives that make them our ancestors and relatives An eye opening re examination of our very notion of relatedness Ancestors and Relatives offers a new way of understanding family ethnicity nationhood race and humanity
