*Ancient and Modern Physics* Thomas E. Willson, 2013-11-08 Excerpt But there are other problems to be explained problems of life and mind and the same knowledge you have explains them as well as the others if you simply avail yourself of it That you do not consider the atom as four fold instead of two fold is your own fault I have not told you anything you did not already know I have only asked you to apply your present knowledge of physics to these problems of life and mind and apply your reasoning powers The chording vibration in an atom of matter of The two planes produces Force or phenomena The three planes produces Life the silver chord The four planes produces Mind the golden chord You say there is no gulf between the prakritic and etheric worlds that it is one continuous world and all its phenomena are by continuity and not impact That is true but it is not the whole truth There is no gulf to cross between the prakritic and etheric worlds none to cross between that and the manasic The four worlds are one great world continuous interchangeable Through the four as well as through the two there is continuity and not impact Whether it is an atom or a world the four are there Nothing no combination of atoms no matter of any kind however small or large can exist in this prakritic world unless it has the four elements which from time immemorial our philosophers have called Earth Water Fire Air meaning the four globes or forms of matter in the universe We do not have to leave the earth to live in the etheric globe It is here Nor do we have to go millions of miles to reach the pranic globe It is here The problems of light and heat are no easier than the problems of birth and death The pranic globe is within us within everything So is the manasic It is here on these higher planes that the chances for worthy study are greatest At least we think so though you may not We live on the manasic pranic etheric globe on precisely the same terms that we live on this of *Ancient and Modern Physics* Thomas E. Barr, 2003-02-28 A considerable amount of public debate and media print has been devoted to the war between science and religion In his accessible and eminently readable new book Stephen M Barr demonstrates that what is really at war with religion is not science itself but a philosophy called scientific materialism Modern Physics and Ancient Faith argues that the

great discoveries of modern physics are more compatible with the central teachings of Christianity and Judaism about God the cosmos and the human soul than with the atheistic viewpoint of scientific materialism Scientific materialism grew out of scientific discoveries made from the time of Copernicus up to the beginning of the twentieth century These discoveries led many thoughtful people to the conclusion that the universe has no cause or purpose that the human race is an accidental by product of blind material forces and that the ultimate reality is matter itself Barr contends that the revolutionary discoveries of the twentieth century run counter to this line of thought He uses five of these discoveries the Big Bang theory unified field theories anthropic coincidences G del s Theorem in mathematics and quantum theory to cast serious doubt on the materialist s view of the world and to give greater credence to Judeo Christian claims about God and the universe Written in clear language Barr s rigorous and fair text explains modern physics to general readers without oversimplification Using the insights of modern physics he reveals that modern scientific discoveries and religious faith are deeply consonant Anyone with an interest in science and religion will find Modern Physics and Ancient Faith invaluable *Ancient & Modern Physics* ,2006
