

> Biology Workbook answers

Any example answers to questions taken from past question papers, practice questions, accompanying marks and mark schemes included in this resource have been written by the authors and are for guidance only. They do not replicate examination papers. In examinations the way marks are awarded may be different.

Chapter 1

Exercise 1.1

Focus

1

Term	Description
nutrition	making more of the same kind of organism
respiration	removing waste products of metabolism
growth	a permanent increase in size and dry mass
excretion	taking in materials for energy, growth and development
reproduction	chemical reactions that release energy from nutrient molecules

Practice

2

Growth – the plant makes new cells so it increases in size.

Reproduction – gametes are made in the flower, which fuse together to produce a zygote; this is sexual reproduction. (Note: If students have not previously studied reproduction, accept an answer that refers simply to reproduction as making more of the same species.)

Excretion – the plant makes oxygen as a waste product of photosynthesis, and loses it from its leaves.

Sensitivity – the plant senses the direction from which light comes, and the stem and leaves grow towards it.
