A Simple Model Of Biblical Cosmology:

A Simple Model of Biblical Cosmology F. Carlyle Stebner, 2014-10-29 This book presents a simple but controversial view of the creation of the universe The Bible is the inerrant word of God and what the Bible teaches should be the basis for any model of creation Secular science does not agree but all should study different theories and models especially in a college and university setting where different points of view should be tolerated and encouraged rather than suppressed

Christology and Cosmology J. Rebecca Lyman, 1993 This book offers a fresh interpretation of the relation between Greek thought and ancient Christian theology through an analysis of three foundational and controversial thinkers Origen Eusebius of Caesarea and Athanasius As an urban teacher civic apologist and ascetic bishop each of the three theologians offered a distinctive Christian response to the religious and ecclesiastical issues of the third and fourth centuries Each cosmology and Christology therefore reveals particular concerns about individual and social identity and salvation in the developing Christian community

The Bible's Hidden Cosmology Charles Gordon Strachan, 2005 Strachan author of Jesus the Master Builder and Chartres turns back to the roots of biblical wisdom Patterns appear repeatedly throughout the Bible and influence festivals and belief systems but what are their bases And are they incidental or deliberate By returning to the principles of ancient cosmology that is how the biblical writers viewed the universe the author reveals a new understanding of the Bible He uses the disciplines of music theory astronomy and astrology numerology and sacred geometry to uncover hidden wisdom and allow the ancient secrets of the Bible to shine through This book is a compelling whirlwind through the imagery and metaphor inherent in the Bible giving the reader a deeper understanding of ancient wisdom traditions and a new respect for the implicit coding of the Bible

The Wisdom of Ancient Cosmology Wolfgang Smith, 2003 Wolfgang Smith drawing upon a rare combination of expertise in mathematical physics philosophy and traditional metaphysics has written extensively on interdisciplinary problems relating to these respective domains The present book has evolved out of a key ontological recognition consonant with time honored metaphysical doctrine In keeping with a realist view of cognitive sense perception it rejects the Cartesian dichotomy of res extensa and res cogitans and

obviates what Whitehead referred to as the fallacy of bifurcation In an earlier book *The Quantum Enigma* 1995 the author established two facts first that a consistent non bifurcationist interpretation of physics can be formulated and second that this eliminates at one stroke the various forms of quantum paradox resulting from superposition and the so called collapse of the state vector The crucial ingredient of the new approach mandated by the aforesaid recognition is an ontological distinction between the physical domain accessed via measurement and the corporeal accessed by way of cognitive sense perception In the present book the author extends this metaphysically based interpretation from fundamental physics to contemporary cosmology With the aid of a few additional conceptions consonant say with the Thomistic doctrine such as the concept of what he terms the extrapolated universe or the notion of vertical causation relating to intelligent design he treats a broad range of issues from a unified metaphysical point of view Not surprisingly his conclusions tend to be radically at odds with the prevailing interpretations of scientific data regardless of whether these are based upon naturalistic or scientistically theistic presuppositions The author's approach may thus be characterized as the third alternative the sole option it appears consistent with the Aristotelian and Platonist traditions and with the wisdom of Christianity as delineated especially in the Patristic writings *The Bible and Astronomy* Johann Heinrich Kurtz, 1857 *Cyclopaedia of Biblical, Theological, and Ecclesiastical Literature* John McClintock, James Strong, 1883 *Encyclopedia of Science and Religion* Jacobus Wentzel Van Huyssteen, 2003 A multidisciplinary approach that addresses all aspects of the dialogue between the sciences and the world's religions reaching into the humanities as well as into the physical sciences and technology Examines controversial issues such as human cloning and stem cell research long with more traditional questions such as the origins of life the nature of sin and the philosophy of science and religion 4 volumes *Cosmos, Life, Religion*, 1988 *The Making and Unmaking of Technological Society* Murray Jardine, 2004 Our inability to make ethical sense of technology is at the root of a crisis This book advocates a Christianity that fully understands technology its responsibilities and its possibilities **Religious Education in a Changing Society** Jannie Malan, Owen Van den Berg, 1983 **Doctrine and Exegesis in Biblical Latin Poetry** Daniel Joseph Nides, 1993 Up to the eighteenth century the Latin biblical epic poets of late antiquity were much read and were influential on various strands within European poetry Milton's *Paradise Lost* is the culmination of the English branch of the tradition Renewed scholarly interest in the literature of the late Roman period has included a revaluation of its biblical poetry But attention has been concentrated on the rhetorical skill of the writers in terms of content it is still often assumed that biblical epic is a straightforward rendering of the bible narrative *Doctrine and Exegesis in Biblical Latin Poetry* throws light on an important but under explored aspect of the content of these works In a thorough study of how two areas of doctrine significant in late antiquity the nature of God and the theory of creation are represented in the biblical epics Daniel Nides shows that the poets were actively commenting on and propagating particular views of the vital doctrinal issues of their time The writers represented in this volume range in time from the fourth to the sixth centuries the female poet Proba

whose Virgilian Cento is one of the earliest examples of biblical epic Cyprianus Gallus Hilarius poeta Claudius Marius Victorius the north African Dracontius and Avitus Bishop of Vienne The author draws on the works of the Church Fathers both Greek and Latin and on Jewish exegetical writings The book should interest students of later Latin literature church history and theology and exegesis **The Church and Contemporary Cosmology** James B.
