Mae Elise Cannon,Lisa Sharon Harper,Troy Jackson,Soong-Chan Rah,2014-09-23 Many people have become angry and frustrated with organized religion and evangelical Christianity in particular Too often the church has proven to be a source of pain rather than a place of hope Forgive Us acknowledges the legitimacy of much of the anger toward the church In truth Christianity in America has significant brokenness in its history that demands recognition and repentance Only by this path can the church move forward with its message of forgiveness reconciliation and peace Forgive Us is thus a call to confession From Psalm 51 to the teachings of Jesus to the prayers of Nehemiah confession is the proper biblical response when God s people have injured others and turned their backs on God s ways In the book of Nehemiah the author confesses not only his own sins but also the sins of his ancestors The history of the American church demands a Nehemiah style confession both for our deeds and the deeds of those who came before us In each chapter of Forgive Us two pastors who are also academically trained historians provide accurate and compelling histories of some of the American church s greatest shortcomings Theologian Soong Chan Rah and justice leader Lisa Sharon Harper then share theological reflections along with appropriate words of confession and repentance Passionate and purposeful Forgive Us will challenge evangelical readers and issue a heart felt request to the surrounding culture for

forgiveness and a new beginning

University Responsibility for the Adjudication of Research Misconduct Stefan Franzen, 2021-05-12 This book offers a scientific whistleblower s perspective on current implementation of federal research misconduct regulations It provides a narrative of general interest that relates current cases of research ethics to philosophical historical and sociological accounts of fraud in scientific research The evidence presented suggests that the problems of falsification and fabrication remain as great as ever but hidden because the current system puts universities in charge of investigations and permits them to use confidentiality regulations to hide the outcomes of investigations The book documents the significant conflict of interest that arises because federal regulation gives universities the responsibility to conduct investigations of their own faculty with severely limited oversight The book is

intended for young research scientists or anyone who wishes to understand the challenges faced by scientists in the workplace today The central thread in the book is an exclusive account of an experienced research scientist who was the first to expose the facts that led to the longest running research misconduct investigation in the history of the National Science Foundation
