

The illustration depicts two House Finches perched on a light brown, textured branch. The bird in the upper left is shown in profile, facing left, with its head slightly turned. It has a prominent reddish-brown crest, a black throat and face, and a body of warm brown. Its wings show grey and black feathers with a distinct yellow stripe. The bird in the lower right is also in profile, facing right, with similar plumage. It is perched lower on the branch, and a small cluster of red berries is visible near its feet. Several other clusters of red berries are scattered along the branch and in the background. The overall style is realistic and detailed, typical of acrylic bird painting.
