to identify an intruder's footprints and properly gather the necessary evidence to prosecute. The EC Council offers certification for ethical hacking and computer forensics. Their ethical hacker exam has become very popular as an industry gauge, and we expect the forensics exam to follow suit. Material is presented in a logical learning sequence: a section builds upon previous sections, and a chapter on previous chapters. All concepts, simple and complex, are defined and explained when they appear for the first time. This book includes Exam objectives covered in a chapter, clearly explained in the beginning of the chapter. Notes and Alerts highlight crucial points. Exam's Eye View emphasizes the important points from the exam's perspective. Key Terms present definitions of key terms used in the chapter. Review Questions contains the questions modeled after real exam questions based on the material covered in the chapter. Answers to the questions are presented with explanations. Also included is a full practice exam modeled after the real exam. The only study guide for CHFI provides 100% coverage of all exam objectives. CHFI Training runs hundreds of dollars for self tests to thousands of dollars for classroom training.

Current Problems of Applied Mathematics and Computer Systems Anatoly Alikhanov, Andrei Tchernykh, Mikhail Babenko, Irina Samoylenko, 2024-09-01. This book is based on the best papers accepted for presentation during the International Conference on Current Problems of Applied Mathematics and Computer Systems APAMCS 2023. The book includes research materials on mathematical problems and solutions in the field of scientific computing, artificial intelligence, data analysis, and modular computing. The scope of numerical methods in scientific computing presents original research including mathematical models and software implementations related to the following topics: numerical methods in scientific computing, solving optimization problems, methods for approximating functions, etc. The studies in data analysis and modular computing include contributions in the field of deep learning, neural networks, mathematical statistics, machine learning methods, residue number system, and artificial intelligence.
