Analytical Design And Control Of Electric Vehicles Power Chain:

Analytical Design and Control of Electric Vehicles Power Chain Souhir Tounsi, 2014-12-29 In this book we describe a methodology of systemic design of electric vehicles EVs power chain reducing the cost and the consumption This methodology rests on the choice of the structure and the components of this chain reducing jointly the cost and the consumption of EVs Indeed a synchronous motor structure to permanent magnets and axial flux reducing the production cost that can be presented under several configurations is defined and restrained in relation to the equivalent structure with coiled rotor or to double excitation The choice of the static converter oriented toward a structure to two levels voltage and to electromagnetic switches is in the goal to increase the reliability of the global system and to push the multiple inconveniences of the IGBTs The adaptation of this low frequency converter structure is assured by insertion of a speed amplifier to gearing Finally the modelling under the environment of Matlab Simulink of the power chain integrating a system of energy recuperation and a system of minimization of the consumption by stacking of three modules on the axis of the motor during the phases of strong acceleration validate this approach of design *Scientific and Technical Aerospace Reports* ,1991 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database **Proceedings of the 2025 8th International Conference on Traffic Transportation and Civil Architecture (ICTTCA 2025)** Gaofeng Zhao, Law Teik Hua, Weizheng Liu, Weiguang Zhang, 2025-07-26 This book is an open access Transportation is the pioneer of economic development In recent years roads and bridges extend in all directions the transportation is convenient and fast and the logistics supply chain is stable and smooth The transportation industry has been developing rapidly and has built a safe convenient efficient green and economic modern comprehensive transportation system In response to the requirements of the rapid development of various engineering construction people continue to put forward new civil engineering topics summarize successful experience through engineering practice and promote the construction of transportation engineering The 2025 8th International Conference on Traffic Transportation and Civil Architecture ICTTCA 2025 will be held on April 18 20 2025 in Tianjin China We sincerely invite scholars and technicians from relevant units to actively participate in the conference exchange technology and promote innovation [Electrical & Electronics Abstracts](#) ,1997 **Application of Smart Technologies in Power System and Smart Grid** Aashish Kumar Bohre, Partha Sarathee Bhowmik, Manisha Dubey, Mohan Lal Kolhe, Sri Niwas Singh, 2025-03-29 This book features high quality research papers presented at the International Conference on Computational Intelligence and Smart Technologies in Electrical Engineering CISTEE 2023 The book offers cutting edge solutions and applications for predictive modeling and sustainable development of power and energy systems with the application of computational intelligence and smart technologies It discusses the use of different practical developments The book discusses practical developments and consolidates the insights of leading experts in power and

energy focusing on the technical social and economic aspects of sustainable solutions This book is well suited for students and researchers with its comprehensive knowledge
