

CELLS AND TISSUES

The basic unit of structure and function in the human body is the cell. Each of a cell's parts, or organelles, as well as the entire cell, is organized to perform a specific function. Cells have the ability to metabolize, grow and reproduce, move, and respond to stimuli. The cells of the body differ in shape, size, and in specific roles in the body. Cells that are similar in structure and function form tissues, which, in turn, construct the various body organs.

Student activities in this chapter include questions relating to the structure and function of the generalized animal cell and to the general arrangement of tissues and their contribution to the activities of the various body organs.

CELLS

Overview

1. Answer the following questions by inserting your responses in the answer blanks.

- | | | |
|---------------------|-----|---|
| <u>Hydrogen</u> | 1. | 1-4. Name the four elements that make up the bulk of living matter. |
| <u>Carbon</u> | 2. | |
| <u>Oxygen</u> | 3. | 5. Name the single most abundant material or substance in living matter. |
| <u>Nitrogen</u> | 4. | 6. Name the trace element most important for making bones hard. |
| <u>Oxygen</u> | 5. | 7. Name the element, found in small amounts in the body, that is needed to make hemoglobin for oxygen transport. |
| <u>Calcium</u> | 6. | |
| <u>Iron</u> | 7. | 8-12. Although there are many specific "jobs" that certain cells are able to do, name five functions common to all cells. |
| <u>Reproduction</u> | 8. | <u>Growth</u> 11. |
| <u>Metabolism</u> | 9. | <u>Responds to Stimuli</u> 12. → |
| <u>Excretion</u> | 10. | |

JG Myers

Anatomy Hw Packet Answers Cells And Tissues:

A Guide to Teaching in the Active Learning Classroom Paul Baepler, J. D. Walker, D. Christopher Brooks, Kem Saichaie, Christina I. Petersen, 2023-07-03 While Active Learning Classrooms or ALCs offer rich new environments for learning they present many new challenges to faculty because among other things they eliminate the room's central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed The importance of learning how to use these classrooms well and to capitalize on their special features is paramount The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls This book provides an introduction to ALCs briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based practical guidance on how to use these unfamiliar spaces effectively Among the questions this book addresses are How can instructors mitigate the apparent lack of a central focal point in the space What types of learning activities work well in the ALCs and take advantage of the affordances of the room How can teachers address familiar classroom management challenges in these unfamiliar spaces If assessment and rapid feedback are critical in active learning how do they work in a room filled with circular tables and no central focus point How do instructors balance group learning with the needs of the larger class How can students be held accountable when many will necessarily have their backs facing the instructor How can instructors evaluate the effectiveness of their teaching in these spaces This book is intended for faculty preparing to teach in or already working in this new classroom environment for administrators planning to create ALCs or experimenting with provisionally designed rooms and for faculty developers helping teachers transition to using these new spaces
