HUMAN ANATOMY AND PHYSIOLOGY

Study of the human organism and its internal body

Anatomy

The study of the structure of the human body and its internal organs

Physiology

The study of the function of the human body and its internal organs

Structural levels

Studying the human body at the cellular, tissue, organ, and system levels

- 1. **Cellular level** - study of the structure and function of cells
- 2. **Tissue level** - study of the structure and function of tissues
- 3. **Organ level** - study of the structure and function of organs
- 4. **System level** - study of the structure and function of systems
- 5. **Whole body level** - study of the structure and function of the whole body

CELLS AND TISSUES

Cells are the basic units of structure and function of the human body

Characteristics of cells

All cells are eukaryotic and have a nucleus

Cells are specialized for their function

Cells are surrounded by a cell membrane

Cells are surrounded by a cell wall

Cells are surrounded by a cell wall

Cells are surrounded by a cell wall

Cells are surrounded by a cell wall

CELLS

Cells are the basic units of structure and function of the human body

NERVOUS SYSTEM

Functions

1. **Control** - The nervous system controls the body's functions

2. **Integration** - The nervous system integrates information from the body and the environment

3. **Communication** - The nervous system communicates with the body and the environment

4. **Response** - The nervous system responds to the body and the environment

5. **Regulation** - The nervous system regulates the body's functions

6. **Coordination** - The nervous system coordinates the body's functions

7. **Protection** - The nervous system protects the body's functions

8. **Repair** - The nervous system repairs the body's functions

9. **Reproduction** - The nervous system reproduces the body's functions

10. **Development** - The nervous system develops the body's functions

11. **Maturation** - The nervous system matures the body's functions

12. **Decline** - The nervous system declines the body's functions

13. **Death** - The nervous system dies the body's functions

14. **Resurrection** - The nervous system resurrects the body's functions

15. **Rebirth** - The nervous system reborns the body's functions

16. **Recreation** - The nervous system recreates the body's functions

17. **Reconstruction** - The nervous system reconstructs the body's functions

18. **Reformation** - The nervous system reforms the body's functions

19. **Reorganization** - The nervous system reorganizes the body's functions

20. **Reorientation** - The nervous system reorients the body's functions

21. **Reorientation** - The nervous system reorients the body's functions

22. **Reorientation** - The nervous system reorients the body's functions

23. **Reorientation** - The nervous system reorients the body's functions

NERVOUS SYSTEM

The nervous system is the body's communication system

Parts of the nervous system

1. **Brain** - The brain is the control center of the nervous system

2. **Spinal cord** - The spinal cord is the main communication pathway between the brain and the rest of the body

3. **Nerves** - Nerves are the communication pathways between the brain, spinal cord, and the rest of the body

4. **Neurons** - Neurons are the basic units of the nervous system

5. **Glial cells** - Glial cells are the support cells of the nervous system

6. **Synapses** - Synapses are the points of communication between neurons

7. **Receptors** - Receptors are the organs that receive information from the environment

8. **Effectors** - Effectors are the organs that respond to information from the nervous system

9. **Control centers** - Control centers are the parts of the nervous system that make decisions about the body's response to information

10. **Communication pathways** - Communication pathways are the parts of the nervous system that carry information between the control centers and the effectors

11. **Support cells** - Support cells are the cells that provide support for the neurons

12. **Protective layers** - Protective layers are the layers that protect the nervous system

13. **Blood vessels** - Blood vessels are the vessels that carry blood to and from the nervous system

14. **Lymphatic system** - The lymphatic system is the part of the immune system that fights off infections

15. **Endocrine system** - The endocrine system is the part of the body that produces hormones

16. **Immune system** - The immune system is the part of the body that fights off infections

17. **Reproductive system** - The reproductive system is the part of the body that produces offspring

ORGAN SYSTEMS OF THE BODY

The body is made up of many organ systems that work together to keep the body functioning

1. **Integumentary system** - The integumentary system is the body's outer covering

2. **Musculoskeletal system** - The musculoskeletal system is the body's framework

3. **Cardiovascular system** - The cardiovascular system is the body's circulatory system

4. **Respiratory system** - The respiratory system is the body's breathing system

5. **Digestive system** - The digestive system is the body's food processing system

6. **Excretory system** - The excretory system is the body's waste removal system

7. **Reproductive system** - The reproductive system is the body's offspring production system

8. **Endocrine system** - The endocrine system is the body's hormone production system

9. **Immune system** - The immune system is the body's infection fighting system

10. **Nervous system** - The nervous system is the body's communication system

11. **Skeletal system** - The skeletal system is the body's support system

12. **Muscular system** - The muscular system is the body's movement system

13. **Cardiovascular system** - The cardiovascular system is the body's blood circulation system

14. **Respiratory system** - The respiratory system is the body's breathing system

15. **Digestive system** - The digestive system is the body's food processing system

16. **Excretory system** - The excretory system is the body's waste removal system

17. **Reproductive system** - The reproductive system is the body's offspring production system

18. **Endocrine system** - The endocrine system is the body's hormone production system

19. **Immune system** - The immune system is the body's infection fighting system

20. **Nervous system** - The nervous system is the body's communication system

21. **Skeletal system** - The skeletal system is the body's support system

22. **Muscular system** - The muscular system is the body's movement system

23. **Cardiovascular system** - The cardiovascular system is the body's blood circulation system

24. **Respiratory system** - The respiratory system is the body's breathing system

25. **Digestive system** - The digestive system is the body's food processing system

26. **Excretory system** - The excretory system is the body's waste removal system

27. **Reproductive system** - The reproductive system is the body's offspring production system

28. **Endocrine system** - The endocrine system is the body's hormone production system

29. **Immune system** - The immune system is the body's infection fighting system

30. **Nervous system** - The nervous system is the body's communication system

31. **Skeletal system** - The skeletal system is the body's support system

32. **Muscular system** - The muscular system is the body's movement system

33. **Cardiovascular system** - The cardiovascular system is the body's blood circulation system

34. **Respiratory system** - The respiratory system is the body's breathing system

35. **Digestive system** - The digestive system is the body's food processing system

36. **Excretory system** - The excretory system is the body's waste removal system

37. **Reproductive system** - The reproductive system is the body's offspring production system

38. **Endocrine system** - The endocrine system is the body's hormone production system

39. **Immune system** - The immune system is the body's infection fighting system

40. **Nervous system** - The nervous system is the body's communication system

41. **Skeletal system** - The skeletal system is the body's support system

42. **Muscular system** - The muscular system is the body's movement system

43. **Cardiovascular system** - The cardiovascular system is the body's blood circulation system

44. **Respiratory system** - The respiratory system is the body's breathing system

45. **Digestive system** - The digestive system is the body's food processing system

46. **Excretory system** - The excretory system is the body's waste removal system

47. **Reproductive system** - The reproductive system is the body's offspring production system

48. **Endocrine system** - The endocrine system is the body's hormone production system

49. **Immune system** - The immune system is the body's infection fighting system

50. **Nervous system** - The nervous system is the body's communication system

51. **Skeletal system** - The skeletal system is the body's support system

52. **Muscular system** - The muscular system is the body's movement system

53. **Cardiovascular system** - The cardiovascular system is the body's blood circulation system

54. **Respiratory system** - The respiratory system is the body's breathing system

55. **Digestive system** - The digestive system is the body's food processing system

56. **Excretory system** - The excretory system is the body's waste removal system

57. **Reproductive system** - The reproductive system is the body's offspring production system

58. **Endocrine system** - The endocrine system is the body's hormone production system

59. **Immune system** - The immune system is the body's infection fighting system

60. **Nervous system** - The nervous system is the body's communication system

61. **Skeletal system** - The skeletal system is the body's support system

62. **Muscular system** - The muscular system is the body's movement system

63. **Cardiovascular system** - The cardiovascular system is the body's blood circulation system

64. **Respiratory system** - The respiratory system is the body's breathing system

65. **Digestive system** - The digestive system is the body's food processing system

66. **Excretory system** - The excretory system is the body's waste removal system

67. **Reproductive system** - The reproductive system is the body's offspring production system

68. **Endocrine system** - The endocrine system is the body's hormone production system

69. **Immune system** - The immune system is the body's infection fighting system

70. **Nervous system** - The nervous system is the body's communication system

71. **Skeletal system** - The skeletal system is the body's support system

72. **Muscular system** - The muscular system is the body's movement system

73. **Cardiovascular system** - The cardiovascular system is the body's blood circulation system

74. **Respiratory system** - The respiratory system is the body's breathing system

75. **Digestive system** - The digestive system is the body's food processing system

76. **Excretory system** - The excretory system is the body's waste removal system

77. **Reproductive system** - The reproductive system is the body's offspring production system

78. **Endocrine system** - The endocrine system is the body's hormone production system

79. **Immune system** - The immune system is the body's infection fighting system

80. **Nervous system** - The nervous system is the body's communication system

81. **Skeletal system** - The skeletal system is the body's support system

82. **Muscular system** - The muscular system is the body's movement system

83. **Cardiovascular system** - The cardiovascular system is the body's blood circulation system

84. **Respiratory system** - The respiratory system is the body's breathing system

85. **Digestive system</**

Anatomy Physiology Senior Final Study Guide Introduction

Anatomy Physiology Senior Final Study Guide Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Anatomy Physiology Senior Final Study Guide Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Anatomy Physiology Senior Final Study Guide : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Anatomy Physiology Senior Final Study Guide : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Anatomy Physiology Senior Final Study Guide Offers a diverse range of free eBooks across various genres. Anatomy Physiology Senior Final Study Guide Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Anatomy Physiology Senior Final Study Guide Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Anatomy Physiology Senior Final Study Guide, especially related to Anatomy Physiology Senior Final Study Guide, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Anatomy Physiology Senior Final Study Guide, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Anatomy Physiology Senior Final Study Guide books or magazines might include. Look for these in online stores or libraries.
