content and include photos of clinical equipment and supplies Handbook of Veterinary Neurology - E-Book Michael D.
Lorenz,Joan Coates,Marc Kent,2010-12-07 Handbook of Veterinary Neurology provides quick access to vital information on
neurologic conditions in a wide range of species including canine feline bovine caprine equine ovine and porcine A problem
oriented approach makes it easy to diagnose and treat neurologic problems in small and large animals The coverage of
disorders by problem not by established disease diagnosis emulates how animals present to the veterinary hospital and
simplifies the formulation of a correct diagnosis Within each chapter discussions of neurologic disease include a review of the
localization criteria and the diseases that can cause that problem plus treatment and surgical techniques Lead author
Michael D Lorenz brings decades of experience to neurologic assessment using a diagnostic approach that requires minimal
knowledge of neuroanatomy A problem based approach is organized by presenting sign rather than by condition guiding you
to logical conclusions regarding diagnosis and treatment Algorithms diagram the logic necessary to localize lesions and to
formulate diagnostic plans Coverage of current diagnostic techniques includes the use of diagnostic tools such as radiology
spinal fluid analysis electrodiagnosis and MR imaging Case histories in each chapter present a problem and the results of the
neurologic examination then ask you to solve the problem by localizing the lesion listing probable causes and making a
diagnostic plan Answers are provided at the back of the book A consistent format for each case history includes signalment
history physical examination findings and neurologic examination A comprehensive appendix describes species and breeds
that have a congenital predisposition for particular neurologic diseases Extensive references make it easy to pursue in depth
research of more advanced topics A companion website includes 20 narrated video clips with accompanying PowerPoint
slides that correlate to the case histories in the book covering neurologic assessment and clinical problems such as paresis of
one limb tetraparesis stupor seizures ataxia of the head and limbs and cranial nerve disorders Two new co authors Jean
Coates and Marc Kent board certified in neurology enhance the credibility of this edition A full color design and numerous
illustrations include enhanced images of neuroanatomy and pathology **Student Study and Self Test Guide for Dental
